LOT 3

Reg # EMB01547
TR ME FIREWATER 5792 RET x HOODOO MS GEORGE 20116

Semen packages will be offered in the 2013 National Sale in Fort Worth. This will be the only semen offered until January 1, 2015.

For details on the semen packages, contact Cheramie Viator, Roy Miller or Greg Hubert.

Supreme brings forward a unique combination of genetics — Hoodoo and Firewater.

Phenotypically, Supreme is one of the most impressive bulls to hit the Charolais scene in many years. Incredibly thick and sound, with an excellent foot shape, he is going to leave a mark on the breed. This powerhouse will add pounds, design and maternal value. This semen offering is your opportunity to be one of the progressive-minded breeders who advances their program with **SUPREME** genetics! His first calves are on the ground and they are flat stomping good!!

CHAROLAIS

VIEWPOINT

J. Neil Orth, Executive Vice President

Back To Our Roots

Charolais On Display In Texas!

Last month, much of the beef industry focus was on the historic National Western. An event with equal prominence in the beef industry and particularly to the Charolais breed is the 117th Fort Worth Stock Show & Rodeo. The continued success of these two iconic industry events is no accident. The “shows” began as quasi entertainment for cattlemen, yet were strategically located in close proximity to stockyards and packing facilities. Both events now are firmly rooted in two of the 25 largest cities in the U.S.

The first Fort Worth Stock Show was held in October of 1896. The early events were held in conjunction with the National Livestock Exchange Convention and were the result of collaborations of ranchers and the Fort Worth Stock Yards. Then, just as our mission is today, the goal was to “facilitate interest in cattle.”

The original Fort Worth Stock Show was held outdoors under a few shade trees. The modern version of this event is almost completely indoors in state of the art facilities covering several acres. Today, the economic impact of the Fort Worth Stock Show’s 23 day run is well over \$100 million for the Fort Worth area. More than 1,000,000 people from 60 countries will attend.

It’s fairly easy to quantify the value of both Denver and Fort Worth livestock events to the respective communities. Hundreds of families converge on a major city for several days dining, shopping and essentially, living. However, we simply can’t quantify the value of showcasing the livestock industry to consumers, many being totally clueless about where their food originates. These brief exposures provide opportunity for everyone involved in the beef industry to show and tell our

“...our mission today is no different than those ranchers and stockyards managers more than a century ago. The mission is to “facilitate interest in cattle.”

The history of the Fort Worth Stock Show is well documented and had several titles in its illustrious history. The events were known as Fort Worth Stock Show, a.k.a. Texas Fat Stock Show, a.k.a. Southwestern Exposition and Livestock Show, and today, the Fort Worth Stock Show & Rodeo.

In 1918, the rodeo was added to the list of events and today is considered the world’s first indoor rodeo. The first rodeo featured 12 performances. Several of the early inaugural rodeo events in Fort Worth are now deeply rooted in all rodeo history. The 2013 rodeo will feature 30 performances and will be broadcast around the world.

The 34th National Charolais Sale and 44th National Charolais Show will return to the 117th edition of the Fort Worth Stock Show & Rodeo. The complete sale booklet can be found in this issue. Definitely add the following events to your stock show calendar. Friday, February 1, you’ll want to attend the reception at 2:00 PM, preceding the National Charolais Sale held at 3:00 PM, in the Richardson-Bass Building West Arena pen area. Saturday, February 2, the day begins at 10:00 AM with the 44th National Charolais Show, held in the East Ring of Watt Arena.

The Charolais breed is inextricably linked to Texas and the Fort Worth Stock Show. From the Charolles region in France to Mexico then to America through Texas, Charolais began to change the American beef industry landscape as early as 1934. Our host for the 2013 national events is the Charolais Association of Texas (CAT). The participating breeders and members of CAT continue to play a major role in the success of the Charolais breed in Texas as well as all of the Southwest U.S.

story to a consumer generally trusting farmers and ranchers, but not believing farmers and ranchers have much influence over the product they purchase in their local supermarket.

A 2012 research report from The Center For Food Integrity indicates consumers are receptive to information. In many cases, 10%-15% of consumers participating in the study change their minds after receiving a mere 10 minutes of educational information.

The take home message for exhibitors is realizing our mission today is no different than those ranchers and stockyards managers more than a century ago. The mission is to “facilitate interest in cattle.” The difference is there’s a whole lot more at stake than ever before. As Charolais enthusiasts, we want to showcase our breed. As beef industry representatives, we must showcase our system and our product.

On behalf of the American-International Charolais Association, we encourage you to join us for the 34th National Charolais Sale and 44th National Charolais Show. We want to extend a special thank you to the Charolais Association of Texas for their always-generous hospitality. Throughout the years, the National Sale has served as a tremendous genetic resource, producing many champions and top producers. This year’s offering may well be the best yet!

American-International Charolais Association

The AICA is the official registry for Charolais and Charbray cattle in the United States. Charolais cattle were first brought to the U.S. in 1936. In 1957, the American Charolais Breeders Association and the International Charolais Breeders Association merged forming the present AICA. Membership in the AICA is obtainable when the applicant has ownership in at least one animal, and has paid the initial membership fee of \$125. AICA annual dues are \$100.

Dues Reminder

2013 dues are now due -\$100 active member, \$25 juniors. Online passwords will not work until 2013 dues are paid.

Female Inventories in the Mail

All active and junior members will receive their 2013 female inventory in the mail in the month of January. As in years past, there are 2 different performance programs to enroll females in. The WHR program is \$14 per female and includes a free registration and transfer on the calf born in 2013. EPDs are available on unregistered calves. In the PPR program, females are enrolled at no charge, fees are paid on the calves as they are registered and transferred depending on their age. EPDs are not available on unregistered calves.

Enrollment Available Online

Quick and easy enrollment is available online by logging in with your breeder number and password. Click into "my inventory" to get started. Members using the online program to enroll females do not need to return the paper forms. To receive the lowest enrollment fee, have all enrollments done by April 1st.

Advertising Deadline

The deadline to place advertising in the March 2012 Charolais Journal is January 25. Contact your area field representative about advertising opportunities in this issue as well as other available options.

Spring Sire Summary Available

2013 Spring Sire Summary is available online at www.charolaisusa.com. Find a link on the homepage and more information under the "Performance" tab.

AICA Mail

AICA no longer gets mail at the post office box. Please make sure all correspondence for AICA or the Charolais Journal is addressed to: 11700 NW Plaza Circle, Kansas City, Mo 64153

AICA Billing Statements

AICA statements are sent at the beginning of each month. Any activity from the previous month will be listed on your statement.

AICA Offers Online Advertising and Marketing Opportunities

The AICA website (www.charolaisusa.com) offers banner ads on the website to advertise your Charolais operation or upcoming sale. The banner ads can be linked directly to your website or sale catalog. The ads are \$250 per month or \$200 for two weeks. Normally, the ads will be put on the website within 2 days after submission.

Want to reach your customers directly? Email blasts are now offered to drop your advertisement straight into the inbox of thousands! Email blasts work great for upcoming sales or any ad that runs in the Charolais Journal. In order to be eligible for an email blast, you must run no less than a full page ad in the Journal. Blasts are \$400 in addition to the cost of the ad in the Charolais Journal.

Let the Journal staff know when placing your Journal ads if you wish to do an email blast.

The Charolais Journal is now offering more services to sale booklet advertisers. Not only is the Charolais Journal an excellent spot to promote your sale, but booklets are now online! Easily accessible on the AICA website, check out the sales coming near you.

AICA using GeneSeek

The AICA is now using GeneSeek for parentage testing, contact Marilou Wegner to request a kit. The kit is specific to the animal being tested. AICA rules require AI sire and donor cows be tested if they have not been.

Dispose of animals

Dispose of animals you no longer have by using the on-line system. The disposal button is at the bottom of the "Quick Look" screen. DO NOT dispose of bulls still being used, regardless of their status. DO NOT dispose of animals you are selling with papers.

Junior National Benefit at the 34th National Sale Fort Worth, Texas, Friday, February 1, 2013 3 p.m. • Bid Online at DV Auction

In Fort Worth, you will have the opportunity to acquire a unique genetic lot – the Junior National Semen Tank containing semen from breed leading sires!

The tank, a MVE Millennium 2000 XC 20, has been graciously donated by Carl Rugg, Bovine Elite, LLC, College Station, Texas. This 140-day tank contains 6 canisters allowing for storage of 720 straws of semen.

In addition, the tank will contain semen from breed leading sires! Plan to visit the AICA website a week before the sale and click on the “Junior National Semen Tank” banner for a complete inventory of sires included.

The 2013 AIJCA Junior National promises to be exciting! AIJCA families from over 25 states will gather in Texarkana for a week of education, contests and shows. Proceeds from this lot will benefit building the Charolais breed’s successful future.

If you have any questions, contact Larry Lehman, 940-437-5900.

Marilou Wegner,
AICA Recording Secretary

Transfer of Bred Females

Must include breeding —
AI or natural service

One rule AICA members often are confused about is the rule regarding bred females. Our rules require females sold bred to have the breeding transferred on the paper. In other words, the buyer should be able to register the calf resulting from that service without getting further signatures. This includes both AI service and natural service.

When you sell a female with AI breeding, the AI signature must be either on the back of the certificate or in your signature account at the office. The signature goes with the cow as added value. If the cow does not calve to the AI bull, or the calf is never registered, that AI signature stays in the buyer account to be used on a different calf or transferred on to someone else. You cannot transfer bred females without including the service information, signatures and service dates.

AICA rules also require 17 days between service dates. This means for example if you are selling a female bred to an AI bull and then follow up with a pasture exposure, there must be at least 17 days between those service bulls. Any females sent to us for transfer without at least 17 days between service dates will be returned. You cannot allow the dates to overlap for obvious reasons. Your buyers expect to be able to register the calves resulting from the breeding transferred with the cow. Service too close or overlapping makes registering the resulting calf difficult without the buyer being required to DNA test the calf.

The rules regarding transferring bred females are designed to protect your buyers. When you sell bred females, the buyer expects to be able to register the calf. As the seller, you are responsible for providing accurate and reliable information to the association on these females. Contact me at mwegner@charolaisusa.com if you have questions regarding these rules.

AICA dues for 2013 are now due. Active member dues are \$100, junior dues are \$25. You will also be receiving your female inventory forms in the mail in January. On-line enrollment is available by logging into your account at www.charolaisusa.com. Chose the "my inventory" button under the "my herd" tab.

JUNIOR

VIEWPOINT

Chelsea Woodcock, Secretary

Join Me

Advocate, Inform, Attend.

Hey Charolais Juniors! For those of you that do not know me, I am Chelsea Woodcock your AIJCA Jr. Board of Directors Secretary for the 2012-2013 year. I am currently a junior at California State University-Fresno studying Animals Science-Pre-Veterinary Science.

I hope that everyone has enjoyed your Christmas and New Year holidays with your family and friends. I cannot believe that another year has begun! What does this mean exactly? Many people set goals or New Year's Resolutions that they want to meet throughout the year. A majority of people give up on these goals about a month into the New Year because they are too extreme. I would like to challenge every one of you, the juniors of the AIJCA, to join me and set the following goals for this year.

The first goal is to be an advocate for the Charolais Association, the beef industry and agriculture in general. In the last year, I attended Youth Beef Industry Congress (YBIC)

just directly from the grocery store).

The second goal is to attend the 2013 AIJCA Charolais Junior National in Texarkana, Ark. July 14-20th. It is my goal to encourage as many Charolais juniors to attend at least one Junior National in their junior showing career. My first Charolais Junior National was in Hutchinson, KS in 2005. It was like being the new kid at school, I didn't know anyone (besides the other California Charolais juniors), didn't know what to do and half the time, where to go. I do know, however, by the end of that week I had learned what the AIJCA could do for me and was ready to come back the next year. I made many friends there in Hutchinson, which I have become even closer to throughout our years of involvement. In addition to adding many new friends to my life, I discovered the broad amount of contests offered, from individual to team; I became more knowledgeable from the leadership conferences; and I became inspired to lead by the board of directors. In the

"... join me and set the following goals for this year. The first goal is to be an advocate for the Charolais Association, the beef industry and agriculture... The second goal is to attend the 2013 AIJCA Charolais Junior National..."

with the AIJCA Jr. Board of Directors, our Charolais Junior National and our animal science club meetings at Fresno State and listened to several speakers that are passionate about our industry and how we can get involved. I learned that being an advocate does not necessarily mean making a big stand, but just to do something. This "something" can be as little as telling your friends about the activities you are involved in, like the Charolais Association, or writing a blog about your daily interactions with agriculture. In the health conscious and environmental friendly world we are growing up in, it is our job as the future of agriculture to help inform consumers on how we raise animals and where their food comes from (not

years following, I also discovered that our association helps our juniors with the furthering of their education through the scholarship foundation. This year's Junior National will be another great year full of fun, competition, leadership and scholarship opportunities! As someone who travels a great distance, I can speak from experience that the distance and time spent in the truck is well worth it.

In conclusion, I would like to wish everyone a Happy New Year and encourage you to set these goals and to also set a personal goal for yourself! Look forward to seeing you in Texarkana! **CJ**

Choice of the Herd

Persistence can lead to success!

After years of trying to persuade Oak Hill Farms to consign the "Pick of the Herd" to the National Sale, it will finally happen in Fort Worth, Texas! Oak Hill Farms and the Wayne Bennett family have a small and exclusive elite herd of Charolais cattle. They have a definite breeding program which "Focus on the Family" and is built around one of the most proven cows EVER in the Charolais breed - JWK Vanessa D029 ET. D029 and her daughters have been crossed with proven Charolais sires to stack as many great proven cows into their pedigree as time has allowed in the Oak Hill program. Vanessa D029 is now deceased and there are no more embryos to put in. Over 100 progeny have been registered from her.

Oak Hill has only sold a donor cow or two in the National Sale before, including a Wyoming Wind x D029 three year old female for \$16,500 in the Louisville, Kentucky National in 2007. But, this time the buyer will be able to pick any female they want from the Oak Hill herd. Charolais Journal fieldman Floyd Wampler has been quite helpful with Wayne developing the Oak Hill herd, so give either of them a call to discuss the options that are available in this exciting selection.

Presented by: Oak Hill Farms, Wayne Bennett, Dawsonville, Georgia

one of our best for
2013 Sale.

Choice of the Herd

It has been four years since David Hubert has consigned the "Choice of the Herd" from the Hubert Charolais Ranch cow herd. In fact, the last time he sold this choice it was right here in Fort Worth in 2009 during the last National Charolais Sale here. That lot was the Choice of the Schurrtop HCR Rancher daughters and the late Gilbert Link took that choice home for \$9,500. Prior to that, in the National Charolais Sales the choice of the HCR herd sold for \$10,500, \$13,000, \$12,000 and \$10,000! Those selections were purchased by R & K Angus, Sonstebly Charolais, Wright Charolais and Summit Farms. There is opportunity here within this selection.

2012 finds the Hubert Charolais Ranch herd in its 54th year of purebred breeding. There are 140 mature females in this high quality herd, including 42 daughters of Rancher, 25 daughters of LT Western Edge and 10 Wyoming Wind daughters. The 60 plus yearling polled heifers are also included in this choice. In the last seven years 460 bulls have been sold at auction during the annual HCR Bull Sale for an average of \$3,554. The dams of those bulls comprise this selection.

The seller would like this "Choice of the Herd" to be completed by May 1, 2013.

Presented by: Hubert Charolais Ranch, David Hubert, Oakley, Kansas

Selling a Syndicated Semen Package

The buyer or buyers of this exclusive syndicated interest will be entitled to 500 units of semen and 250 signings per year. Additional signings can be purchased for \$25.00 each. NO SEMEN will be sold again until January 1, 2015!

This stud will be admired by a wide variety of cattlemen in Fort Worth. Phenotypically, Supreme is one of the most impressive bulls to hit the Charolais scene in many years. Incredibly thick and sound, with an excellent foot shape, he is going to leave a big mark on the breed. This powerhouse will add pounds, design and maternal value. He combines two of the most known lineages

in the breed today...Fire Water and HooDoo. Fire Water needs no introduction, yet we always hear how "everybody" has a Fire Water son. After a little research, here are the facts as of December 10, 2012: (1) There are only 10 Fire Water sons in our breed that have sired more than 20 registered progeny. (2) Only 25 sons have more than one progeny registered. (3) Only 12 breeders have more than 10 calves registered. (4) More than half of all grand progeny are sired by only 3 sons.

Summit Supreme X01 is a direct son of the \$16,000 HooDoo Z0116 donor that was the "Choice of the Herd" in the 2007 National Charolais Sale. Z0116's first daughter she produced at Summit Farms sold for \$16,500 during the 2010 Northern Exposure Sale. X01 himself has only been shown a few times with these results; as a calf he was the 2011 National Reserve Senior Bull Calf Champion in Louisville and at Denver in January 2012 he was the Senior Bull Calf Champion, this summer he was named the Iowa State Fair

Reserve Grand Champion Bull and this past fall the Grand Champion at the NILE in Billings.

This will be a one-time offering. There is at least one group being put together to try to buy the syndication with semen packages consisting of 5 to 10 breeders dividing the 500 units. The semen package buyers cannot ever sell, donate or give semen away. Signings will be issued to only the membership number who purchases a semen package. A purchaser can sell females bred to Supreme X01, but not breeding privileges. This will make this an "exclusive" semen offering!

Presented by: Summit Farms, Alden, Iowa & Silver Spur Ranch, Encampment, Wyoming

Herd Sire

What an opportunity to get your hands on a game changing young herd sire prospect! If you have been hearing the buzz about the All State calves, this guy will solidify it. He can meet your herd sire wish list and more. Allworld possesses tons of muscle, bone, performance, low birth weight EPDs and tremendous growth.

His sire was the \$25,000 1/2 interest herd sire from the 2010 Effertz Key Ranch Bull Sale and then went on to be the 2011 43rd National Charolais Show Reserve Junior Champion Bull, standing only behind TR PZC Mr Turton, the National Champion and a full brother to the dam of this herd sire prospect. So there it is the maternal side of this pedigree tabulation; Allworld's dam is also a full sister to the last two National Champion Females; Fire Girl and Ivory Angel. Those two heifers sold at the last two National Sales at \$50,000 and \$76,000.

The full sister dam to this bull, PZC TR Brooke 932P was a high-seller in the 2009 Northern Exposure Sale.

Give yourself a little trip around the breed with AM Allworld. He and his full sisters will have a lot of friends in Fort Worth. Selling 3/4 interest and full possession.

Herd Sire

Selling one-half interest and the full possession starting September 1, 2013. Not many bulls have gone to the same prestigious big time cattle show and accomplished what this guy has pulled off. For one, he wins the Grand Championship as a calf at the 2011 American Royal against some big time competition. Then he comes back the following year and almost pulls it off again at the American Royal under another established judge and lands in the Reserve Grand spot.

This bull exemplifies what all breeders strive for; a bull that looks great and possesses tremendous calving ease stats! His CE and BW EPDs are in the top 1% of the breed. His sire is a Fall 2012 AICA CE and BW Trait Leader. His dam records an average birth weight of 78.8 lbs. for 9 natural calves and weaning and yearling average ratios of 102 on those nine progeny.

The fellows at NWMSU will bring "Big Time" down on his condition this spring and summer and walk him one time in their pasture and then deliver him to the new owner in time for the fall breeding season.

Donor Pair & Embryos

When we talked about "stacked" pedigrees, this donor dam is the perfect example. Traditional students of pedigrees, like David Hobbs, Arnold Wienk and Rick Hale know exactly what were talking about. Take a minute and just look at this linebred breeding piece, bred in the finest tradition of the Wienk Charolais Ranch program.

This great flush cow will take your E.T. program to the next level! This donor produced 16 embryos both times she was flushed. Her EPD's are incredible with each number bordering on the top of the breed.

Her calf's sire is a President son out of the Duke 914 dam of the Royal Breeder's Cup Grand Champion Bull, BCC Crown Royal.

Lot 6A - Polled heifer calf, born: 9-20-12 sired by RE President 935.

Selling Six Embryos - Buyers Choice of Sires!

Wait for itLegendary! This powerful donor dam is still writing pages of Charolais history. Those that have been to see her, after hearing how good she is, walk away saying she is even better than they were told!

One of her first progeny on the ground topped the open heifers at the National Sale right here at Fort Worth in 2009 when Dan Sullivan paid \$11,000 for the Stealth daughter. A son was National Spring Calf Champion the next day. Three of her daughters comprised the 2009 Denver Grand Champion Pen-of-Heifers and judge Dave Nichols added one to his small Charolais herd in Manhattan, Kansas.

Two of her sons by Rocketfuel sold for \$10,500 to Thomas Ranch in Texas and another for \$15,000 (1/3 interest) to Nate Suttles in Illinois. That son is WC-CCC Full Metal Jacket and he was the National Junior Bull Calf Champion in Louisville and he comes to Fort Worth in a position of power, along with a full sister that will also be in contention.

This flush will be completed at Yackley's Trans Ova in South Dakota and will be at no expense to the purchaser of these embryos. If six embryos are not achieved, a pro-rated refund will be made.

Presented by: Wight Charolais, Derry Wright & Cody Cattle Co., Cody Runft, Richmond, Missouri

Selling a Guaranteed Successful Flush & Embryos

Named after the famous singer Lady Gaga, this heifer has also made people stand in shock and awe! Bar S Lady Gaga grabbed National attention this past summer when famed cattle judge Jason Hoffman, Thedford, Nebraska pulled her from the line-up at the AIJCA Junior National Bred & Owned Show to be the National Champion! She had previously been named the Ozark Empire Fair Grand Champion in both the open and junior shows, Grand Champion at the Kansas State Fair Junior Show and twice a Denver class winner.

Check out this pedigree! Lady Gaga is sired by the National Champion Bull that has sired five of the last eight National Champions. Her pedigree also possesses the National Champion Zsa Zsa and her Reserve National Champion dam Thomas Ms Bonanza 8698.

Her three embryos that sell are 3/4 sibs to \$18,000 ROR Ignition 1023, sired by Knob Creek and out of a Fire Water daughter. He was also the 2011 American Royal Reserve Grand Champion Bull. Another Knob Creek winner is Bar S Ms Priority 0607, the Grand Champion Female at both the 2012 Missouri & Iowa State Fairs.

Bar S Lady Gaga 0961 is open and ready to flush to the sire of your choice at Cross Country Genetics, Manhattan, Kansas.

Selling a Guaranteed Successful Flush and Embryos

For the past seven years, LT Carol 4105 has proven to be the benchmark producer at Lindskov-Thiel Charolais. Her seven calves all bulls, have given her a unbeatable progeny performance record with an average weaning weight on those seven bulls of 852 lbs. and average weaning weight ratio of 111. And they didn't quit there with an average yearling weight of 1,439 lbs. to ratio 109. Three of those bulls were the top weaning weight bull of their contemporary group at L-T Ranch.

Not only is LT Carol an AICA Dam of Distinction, on track to become a Diamond Dam in 2013, but her progeny have commanded the top of the market. Her last three sons have sold for \$21,000, \$12,000 and \$40,000 including growth Trait Leader LT Bridger, now siring calves on multiple continents.

This breed leading donor has only been flushed three times, once to LT Easy Blend with 9 embryos produced; once to LT Long Distance with 10 embryos; and once to Duke 761 with 10 embryos produced again.

There is no guess work here!

Selling a Guaranteed Successful Flush and Embryos

She was crowned the National Champion Female at the 2006 National Western Stock Show in Denver for Megan Johnson and her family. It was said then and still holds true today, that she is a "crown jewel" of a genetic breeding piece. Cardinals Lady E930 was an awesome show heifer and an even better looking brood matron.

Her sire is Cardinals Patriot, whose dam is also the dam of the great Cardinals Maverick, who had sired five Grand or Reserve Grand Champion Denver Pen-of-Bulls during the National Western Stock Show and left many super productive brood cows in the breed. The dam of Cardinals Lady E930 had also placed every bull she ever produced into those champion pens of bulls.

With as much excitement in the Charolais breed right now, this cow can produce some big time progeny on whatever you choose to flush her to. The Suttles and Johnson's would be flexible to split a purebred sired flush and a club calf sired flush with the purchaser of this flush lot. They certainly believe that all will be in the money either way you go. Cardinals Lady E930 is open and ready to flush immediately following this sale.

As an added bonus lot, take your choice of embryos sired by either All State or Turton.

Selling Guaranteed Successful Flush & Embryos

Selling the rights to one guaranteed successful flush to the sire of the buyer's choice.

This crowd favorite has climbed her way to the top. As a weaned heifer calf she was the 2010 National Senior Calf Champion at the American Royal, then on to Denver 2011 and she was again Junior Calf Champion, then Reserve Grand 2011 Missouri State Fair, onto the American Royal in the fall 2011 she powered up to the Grand Champion Female circle and a few weeks later B3 Miss Maura 17X ET is the National Reserve Grand Champion. Only the \$76,000 Ivory Angel gets in front of her.

She is bred to be a winner. Her sire is owned by well-known club calf breeder Greg Kroupa in South Dakota. Her dam also accumulated many championships in 2004 including Reserve Grand AIJCA Junior National and Grand Champion 2004 American Royal. Her dam's sire was a full brother to a National Champion and her maternal grandsire was a Reserve National Champion.

Make yourself a champion with this special flush.

Selling Guaranteed Successful Flush & Embryos

Add this to start footnotes: There are not many donors in our breed with a Milk and Total Maternal number like this.

Want to fix your numbers immediately out of your herd sire, or continue to build on your top EPD sire? Look no further. This superior donor at Summit Farms is more than capable of getting that done. Miss Endure is in the top 20% of the breed for weaning the top 6% for YW, the top 1% for both Milk and Total Maternal!

Her first three natural born bull calves had an average weaning weight of 801 lbs. ranging from 769 lbs. to 858 lbs.

Will you get embryos? Her last two flushes produced 32 and 27 quality embryos. She is due to calve in March and you may take the 1st or 2nd flush.

Monopoly

Selling Guaranteed Successful Flush & Embryos

Without doubt this one female has caused more attention to the Sonderup breeding program, than any female has created in a long time. It doesn't take long staring at this picture to see why. When she appeared in the Sonderup catalog a year ago in December it only took a couple of phone calls to get the ball rolling. When the smoke cleared the winning bidder's owned her at \$10,000. Several club calf breeders were in the hunt as well as elite purebred breeders.

This outcross pedigree donor has a son that will sell in March at the Wright Charolais annual bull sale and he has pounded down the scales!

Ms Turbo is due to calve late March to All State and will then be ready to flush. The purchaser of this flush may take the 1st or 2nd flush.

MF Ms Impressive Katie

Selling Guaranteed Successful Flush & Embryos

Every time this female appears at a show, there are lots of lookers and nervous exhibitors. As a young weaned show heifer she was Grand Champion at the 2011 Kentucky State Fair. That fall she is Hayden Farms choice to be their consignment in the National Charolais Sale where Mac Smith puts her in his elite herd at \$7,000. The next day she is the National Reserve Senior Calf Champion. This past November she scares them again with a calf at her side and is Senior Champion Female in Louisville in a high-quality show under Chad Zehnder. She heads to Fort Worth as one to be reckoned with!

Her sire Field Rep has produced a National Champion, her dam Impressive Katie is a two-time National Division Champion, the embryos selling are by the National Champion that sired many National Champions. It's only fitting that Hayden ET23 is a National Champion.

Bud Heavy

Open Heifer

This great January show heifer prospect comes to Texas not only with tremendous show ring potential, but performance heritage beyond belief! CCC Ms Trendy Bud 205 does several things right, starting from the ground up. She is a square, true footed heifer that is wide-chested and comes out of a smooth shoulder into a bold soft rib. When you stand behind her you realize just how powerful she is while still looking the part from the side profile.

Now, let's talk about what this maternal, performance driven pedigree can do after her show career is over. Her sire is the current National Reserve Grand Bull and the bull that a one-third interest sold for back in March for \$32,500 to Broberg Charolais in Nebraska and to Rocky Meadows Farm in New Hampshire. His name is indicative of his abilities as his progeny are definitely "heavy" on the scales.

The dam of this heifer adds a great part of the performance factor into the mix. She herself, weaned off with a 689 lbs adjusted weaning weight. Her first calf, a bull was born at twenty-two months of age and she weaned him off to an adj. 205 weight of 748 lbs. Her next bull calf had an adj. 205 day weight of 830 lbs and sold to Vedvei Charolais where he is doing a nice job. Her 2011 heifer calf weaned at 781 lbs. to ratio 113 and this heifer weans off at 694 to a 111 ratio. There are not many females in our breed that have pounded them off like that! Take this heifer into the show ring and then on to your embryo program.

Open Heifer

There is so much power here. A huge-bodied, wide-structured one, that will gather a crowd. Of course, she is sired by the National Reserve Grand Champion Bull that is a full brother to the last National Champion Bull - TR PZC Turton and the last two National Champion Females Fire Girl and Ivory Angel.

The cow family of this stout January heifer was the greatest at the former Camp Cooley Ranch in Texas. Her 2002 dam was Summit's choice from that herd and she has put ET progeny into the herds of Summit, Southern Cattle Company and Silver Spur Ranches. The Duke 17J's were the best maternal daughters of any sire at Camp Cooley. Then on to the maternal granddam JDJ Ms Perfect G166, she was Camp Cooley's \$19,000 "Choice of the Herd" from DeBruyker Charolais in Montana and she was worth the investment. 57 progeny are registered out of her at AICA.

Manager Roy Miller has had his eye on this heifer since birth. At one month of age he took me to look at her saying "I want to show you something special." This late summer she hammered the scales down at 895 lbs. adjusted weaning weight. When it came time to pick a National Sale heifer for Fort Worth there was no other choice!

If you're looking for "WOW" in the show ring, your search is over. The Kennedy family tells us this is the best heifer calf they have ever produced and it was a tough decision to let her go. But with their daughter now in college and not showing any longer, they felt that this heifer deserves the opportunity to make her mark in the show arena.

Lot 17

TR Mr
Fire Water
5792 RET

Circle K Juliette is an outstanding daughter of the National Champion Fire Water and built along the same lines as his National Champion daughters Fire Girl and Ivory Angel. Her dam is sired by the Denver Champion Infinite Justice and a granddaughter of RAC Roxanne, the Rocking Arrow Charolais bred show champion. At Circle K Cattle their focus has been to offer cattle that work in the show ring and in the pasture and this heifer calf is certainly capable of both! Juliette is super smooth, with dynamite power to dominate the show ring and become a tremendous potential donor.

David Hobbs ran across this heifer on the east coast and called the National Sale Manager that we needed her in the National Sale. She was tabbed the Reserve Grand Champion Female at only six months of age at the New York State Fair. Finally after some arm twisting the Kennedy's finally consigned her to the National Sale. Look for her in the Jason Hankins show string and study her hard, you will be making the right decision to put her into your show string and donor program.

LT Ledger 0332 P

We have waited with anticipation for these daughters of LT Ledger to start hitting the sales! If this heifer is any indication of what they are to look like, the wait was worth it. Ledger was the exciting \$105,000 2/3 interest yearling bull at the 2011 Lindskov-Thiel Bull Sale.

Breeders from across the United States lined up to bid upon him. When breeders in Fort Worth see this attractive example, there will be another line for the next great one.

This exciting heifer was at side of her dam when Riverdale purchased the "Choice of the Herd" of bred heifers at Eaton Charolais. Her Spring 2010 dam Eaton's Miss Busby 00649 was an easy selection for Bill Nottke and his advising assistants. She had one beautiful udder structure and all the power Eaton females are known for.

Now turn your attention that makes this heifer even better. What a nice set of balanced and powerful EPDs. Look her over, study the pedigree, think about the future and get her on your "to buy" list.

Open Heifer

A perfect balance of what we are striving for. This young lady combines it all; pedigree heritage, numbers, physical appearance and bred by two of our breed leaders.

Derry and Brent have collaborated on this mating to bring their best to the National. This heifer has all the attributes to show. She is big, stout, showy, big-bodied, has the bone and perfect neck. She will show with the best of them and then the credentials to be that donor you've hoped for.

Her sire has been called a "genetic numbers monster" and has become one of our breed highly sought sires. The dam of this heifer has been proven out for years, including being the dam of the Grand Champion 2012 American Royal Bull, LT-WC Templeton 1483 Pld ET and she is still in transplant today at 16 years of age.

One successful flush of seven frozen embryos will be reserved by the sellers.

BB Fancy 02 -
Dam of Lot 20

Open Heifer

The Bracewell's feel that this heifer may be the best they have ever raised! She is absolutely STELLAR! It shouldn't be so surprising as her dam had one of the greatest year's showing in 2001 that any female ever totaled up. BB Fancy 02 was a double champion at the AIJCA Junior National winning both the Grand Champion Bred & Owned Female and the Grand Champion Female over the entire set of heifers assembled in Bowling Green, Kentucky that summer. She then went into the American Royal in Kansas City in October and powered through the competition in the famous junior show there winning the Grand Champion Charolais heifer award as well as the Supreme Championship over all breeds. Then came the mountain top as she went into the National Charolais Show and captured the National Champion Charolais Female trophy! The championships didn't just end with the dam of this heifer, as her sire was the 2006 National Reserve Champion Bull, beaten only that day by the world famous Fire Water.

This heifer possesses the same winning style, balance, correctness and overall eye appeal that her dam and sire did! If you're serious about winning then you are definitely going to want to mark this young March prospect in your National Sale catalog and silence the competition. If you can't make the sale, please check out the video available on the Bracewell's website. BLB Fancy's Silencer Z46 will not disappoint anyone. The Bracewell's will retain one successful flush in this great one.

Silver Spur
2012 Fort
Worth Calf
Champion

Open Heifer

The Silver Spur Ranch Charolais program has been in existence since the 1950's. They have grown their cow herd to over 400 purchased Charolais cows, with functional brood cow traits as their priorities.

Impressive from any angle, this heifer will stand the competition of the show ring and then make a stellar brood cow. She is extremely deep, thick and exceptionally sound structured in addition to those physically outstanding traits, she is terribly gentle and would work for any experienced or young showman.

The Eatons Bullseye 4145 daughters have made beautiful uddered, easy-fleshing daughters at Silver Spur Ranch. With a top 3% Milk EPD and top 20% Maternal EPD this heifer will bring maternal value to any program after her show career.

The Silver Spur show string is no stranger to Fort Worth, winning the 2012 Heifer Calf Championship, the Junior Bull Champion and the Grand Champion Bull honors last year.

JDJ Smokester J1377 P ET

Open Heifer

Old friends Greg Hudspeth and Rick Hale have put their heads together and mated this fancy, young April heifer. You will not find many of these young Smokester daughters out and about. Smokester, a Milk Trait Leader is perhaps the very best of the Cigar on Ms Commander B309 combination. There were many made, but he has surpassed all with his production. His daughters are widely known throughout the industry for udder, milk and maternal abilities.

The bottom side of this pedigree is also breed leading. The Wyoming Wind daughters are even more popular in our breed. The Tradition 066 blood also continues to be recognized as a solid dependable line. The maternal granddam of this heifer, WCR Miss Tradition 316 was a donor dam of distinction producing embryo progeny for Link Charolais, Aschermann and Three Trees Ranch to name a few. The dam of this heifer has also been in transplant producing ET's for Fink Genetics and Rick Evans.

This is a heifer of an impeccable pedigree and family heritage.

Thomas Charolais females. Now for one of the best parts of this selection! You can wait until they have all calved out in March & April before coming to make your selection. Mitch would like that choice to be made by May 1, 2013. So come and pick a female with a herd sire prospect or show heifer at side, a female with a perfect udder structure and a female of the highest quality you can find. They have opened the herd, take advantage today!

Presented by: Thomas Charolais, Inc., The Thomas Family, Raymondville, Texas

Choice of DA Passport daughters

From one of our Texas hosts comes this opportunity to select your choice of DA Passport daughters from the "keeper pen" of first-calf-heifers at Thomas Charolais. There are 26 head of these daughters of the EPD powerhouse sire Passport from which to choose. They are all out of home-raised Thomas Charolais females of outcross pedigrees which should make for some outstanding progeny.

All of these heifers are due to start calving on March 1 and every one is bred to WC-CCC Rocket 118 P ET.

Rocket 118 is a full brother to WC-CCC Full Metal Jacket 1127 P ET that was the National Junior Bull Calf Champion at Louisville last fall and is heading to Fort Worth looking for that National Championship trophy. Both of those bulls sold this past spring in the Wright Charolais & Cody Cattle Co. Bull Sale; Rocket 118 sold for \$10,500 to Thomas Charolais and Full Metal Jacket 1/3 interest for \$15,000 to Nate Suttles in Illinois. Who is their dam? Why none other than Baldrige Sweetheart 7M! Turn to Lot 7 to read more about this outstanding donor.

Again, there are twenty-six of these DA Passport 502 daughters to select from. Passport fixes most numbers in a hurry with a WW EPD of 50, YW of 79, Milk of 19 and Total Maternal of 44, so expect solid numbers on these maternal

2040 Daughter
Top 15% BW, MCE

Selling Buyers Choice of Two (2) Eaton Donors

For the first time in many years the Eaton Family has once again opened up their mature cow herd for a selection of your choice of any two donor dams in the herd. You will get to select from over 1,200 mature females in their elite herd. Over 100 years of family ranching and 40 years of carcass data has been collected. There is extreme genetic dependability throughout this herd. Thirteen of the breed's top 25 Sires for Marbling EPD are listed in the 2012 Fall AICA Sire Summary! Nine Eaton bred sires are Trait Leaders for seven traits!

With 1,403 females enrolled in WHR for 2012, consider these amazing numbers - 1,104 females have a Milk EPD in the Top 10% of the breed - 159 in the Top 1%! In addition, 430 cows rank in the Top 10% for Birth Weight; 489 for Total Maternal.

In recent years, the Eaton program has been recognized with 53 AICA Sterling Dams of Distinction and 10 Diamond Dams.

This choice of the herd is not to be taken lightly. The task of sorting through this powerful herd will take a few days, lots of bouncing through pastures and listening to Lee talk about his cows for days on end...can be daunting! But you will enjoy him, the cows, the beautiful country and when you get done you will enjoy your TWO new donor dams that can lead your program for years to come.

You will have an unrestricted selection from every cow you see and you can wait until they are all calved out to make this choice. They would like you to select by May 1, before breeding season begins. You get to select two cows, so maybe even partnering up with another breeder, so that you can both get one great one! This lot will be sold at one price...two times the money!

Buy it, make your travel plans and make you choices from one of the great cows herds in the nation!

Selling Buyer's Choice of sexed heifer or bull pregnancy.

That's right, your choice of a heifer calf or a bull calf pregnant recipient carrying the mating of two of our breed's most exciting animals. This is one of those matings that Troy Thomas and Chris Polzin dream up that soon multiples into breed excitement. Diablo is the 2012 Denver National Western Grand Champion, quite possibly coming back to win that award two years in a row and then it's on to Fort Worth for the National Show. Diablo's dam CML Pld

Wilma 3S was recently sold for half interest for \$50,000!

Move on then to the dam of these E.T.'s and it's Smokette...described as "The Charolais Breed's Most Stunning Female." TR Ms Smokette 6758S ET was the National Champion Female at Louisville in 2007. Before that she was the Grand open show and Supreme Champion Female at the 2007 South Dakota State Fair, the 2007 American Royal Grand Champion Female, the 2008 Grand Champion Female at the National Western Stock Show in Denver, which all totaled made her the AICA 2007-08 Charolais Show Female of the Year with one of the highest point totals ever!

In 2011 three embryos from Smokette sold online for the highest embryo price seen in quite some time at \$2,500 per egg. And then in 2012 her steer son (pictured) wins the Ohio State Fair Steer Show and sells for \$70,000!

Success is stamped all over this mating and it's your choice to select a bull calf to be your next herd sire or a heifer calf to show, win and become your next donor of breed importance.

LONGRANGE™
 (eprinomectin)

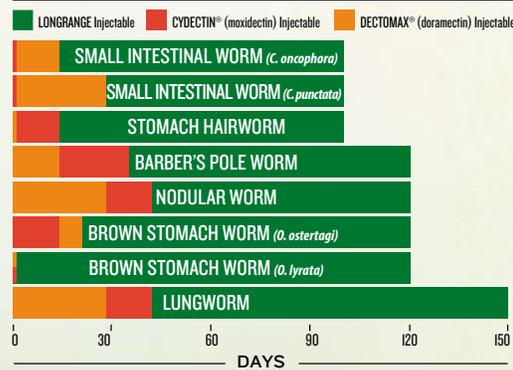

WITH SEASON-LONG CONTROL, YOUR CATTLE *will look so good* THE NEIGHBORS WILL STARE.

Introducing new LONGRANGE with 100 to 150 days of parasite control in a single dose.¹

A pasture full of thicker, slicker cattle is a beautiful sight. Get the look with LONGRANGE. Its unique THERAPHASE™ Technology gives you 100 to 150 days of parasite control in a single dose.²

Break the parasite life cycle and see the performance benefits all season.^{3,4} Ask your **veterinarian** for **prescription** LONGRANGE.

Nothing else comes close to the control of LONGRANGE.^{2,5-7*}

*SAFE-GUARD® has no demonstrated persistent activity.

Available in 500 mL, 250 mL and 50 mL bottles.
 Administer subcutaneously at 1 mL/110 lbs.

For more information, visit theLONGRANGElook.com

IMPORTANT SAFETY INFORMATION: Do not treat within 48 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows, or in veal calves. Post-injection site damage (e.g., granulomas, necrosis) can occur. These reactions have disappeared without treatment.

NADA 141-327, Approved by FDA for subcutaneous injection
For the Treatment and Control of Internal and External
Parasites of Cattle on Pasture with Persistent Effectiveness

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

INDICATIONS FOR USE

LONGRANGE, when administered at the recommended dose volume of 1 mL per 110 lb (50 kg) body weight, is effective in the treatment and control of 20 species and stages of internal and external parasites of cattle:

Gastrointestinal Roundworms	Lungworms
<i>Cooperia oncophora</i> – Adults and L ₄	<i>Dictyoacaulus viviparus</i> – Adults
<i>Cooperia punctata</i> – Adults and L ₄	
<i>Cooperia surmabada</i> – Adults and L ₄	Grubs
<i>Haemonchus placei</i> – Adults	<i>Hypoderma bovis</i>
<i>Oesophagostomum radiatum</i> – Adults	
<i>Ostertagia lyrata</i> – Adults	Mites
<i>Ostertagia ostertagi</i> – Adults, L ₄ , and inhibited L ₄	<i>Sarcoptes scabiei</i> var. <i>bovis</i>
<i>Trichostrongylus axei</i> – Adults and L ₄	
<i>Trichostrongylus colubriformis</i> – Adults	

Parasites	Durations of Persistent Effectiveness
Gastrointestinal Roundworms	
<i>Cooperia oncophora</i>	100 days
<i>Cooperia punctata</i>	100 days
<i>Haemonchus placei</i>	120 days
<i>Oesophagostomum radiatum</i>	120 days
<i>Ostertagia lyrata</i>	120 days
<i>Ostertagia ostertagi</i>	120 days
<i>Trichostrongylus axei</i>	100 days
Lungworms	
<i>Dictyoacaulus viviparus</i>	150 days

DOSAGE AND ADMINISTRATION

LONGRANGE™ (eprinomectin) should be given only by subcutaneous injection in front of the shoulder at the recommended dosage level of 1 mg eprinomectin per kg body weight (1 mL per 110 lb body weight).

WARNINGS AND PRECAUTIONS

Withdrawal Periods and Residue Warnings

Animals intended for human consumption must not be slaughtered within 48 days of the last treatment.

This drug product is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows.

A withdrawal period has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.

Animal Safety Warnings and Precautions

The product is likely to cause tissue damage at the site of injection, including possible granulomas and necrosis. These reactions have disappeared without treatment. Local tissue reaction may result in trim loss of edible tissue at slaughter.

Observe cattle for injection site reactions. If injection site reactions are suspected, consult your veterinarian. This product is not for intravenous or intramuscular use. Protect product from light. LONGRANGE™ (eprinomectin) has been developed specifically for use in cattle only. This product should not be used in other animal species.

When to Treat Cattle with Grubs

LONGRANGE effectively controls all stages of cattle grubs. However, proper timing of treatment is important. For the most effective results, cattle should be treated as soon as possible after the end of the heel fly (warble fly) season.

Environmental Hazards

Not for use in cattle managed in feedlots or under intensive rotational grazing because the environmental impact has not been evaluated for these scenarios.

Other Warnings: Underdosing and/or subtherapeutic concentrations of extended-release anthelmintic products may encourage the development of parasite resistance. It is recommended that parasite resistance be monitored following the use of any anthelmintic with the use of a fecal egg count reduction test program.

TARGET ANIMAL SAFETY

Clinical studies have demonstrated the wide margin of safety of LONGRANGE™ (eprinomectin). Overdosing at 3 to 5 times the recommended dose resulted in a statistically significant reduction in average weight gain when compared to the group tested at label dose. Treatment-related lesions observed in most cattle administered the product included swelling, hyperemia, or necrosis in the subcutaneous tissue of the skin. The administration of LONGRANGE at 3 times the recommended therapeutic dose had no adverse reproductive effects on beef cows at all stages of breeding or pregnancy or on their calves.

Not for use in bulls, as reproductive safety testing has not been conducted in males intended for breeding or actively breeding. Not for use in calves less than 3 months of age because safety testing has not been conducted in calves less than 3 months of age.

STORAGE

Store at 77° F (25° C) with excursions between 59° and 86° F (15° and 30° C). Protect from light.

Made in Canada.

Manufactured for Merial Limited, Duluth, GA, USA.

1050-2889-02, Rev. 05/2012

January is the month to start thinking about choosing your enrollment program for the year 2013.

The AIOA offers 2 different performance programs to enroll females in. The WHR program is \$14 per female and includes a free registration and transfer on the calf born in 2013. EPDs are available on unregistered calves. In the PPR program, females are enrolled at no charge, fees are paid on the calves as they are registered and transferred depending on their age. EPDs are not available on unregistered calves.

Your females can be enrolled using the online system. If you enroll online, there is no need to fill out the paper forms sent to you. The deadline to enroll females online is April 1st. April 1st is the deadline for all programs. Penalty fees apply on females enrolled after April 1st.

Dues Reminder:

You must be an active member to enroll females, so make sure your 2013 dues have been paid. Active member dues are \$100, junior dues are \$25.

Winter BULL Management

By: Heather Smith Thomas

Bulls should be separated from the cow herd after breeding season. This gives them a chance to regain body condition if they lost weight. Fall and winter management of bulls is also important for having them healthy and in top shape for the next breeding season.

Dr. Ram Kasimanickam, Department of Veterinary Clinical Sciences, Washington State University, says any bull that has lost weight should be brought back to adequate condition. "Studies have shown that a body condition score of 5 is adequate for a breeding bull. Yearling bulls need special attention because they are still growing."

Feed supplies and sources may vary from ranch to ranch, on what is economical to feed as forage and/or concentrates or supplements. The main thing is to make sure young bulls have adequate nutrition to keep growing and stay in adequate body condition.

"Bulls need proper levels of trace minerals and vitamins for good sperm production. Vitamins A and E, and selenium, copper, zinc and manganese serve as protectors and prevent damage to sperm from stress. Stress-damaged sperm will result in reduced fertility; even if fertilization occurs, the resultant embryo will fail to develop. Knowledge of soils and what they might lack will tell you which minerals need to be supplemented," he says. This will depend on the region and the individual ranch.

The vitamin-mineral program should be part of the year-round management, and not just seasonal. Producers don't need to do anything special for bulls, but just keep them on the same program as the cows, regarding mineral and vitamin supplementation.

One aspect of bull management that is sometimes ignored is exercise. Bulls need exercise to stay fit. "There are many ways to make sure they get enough exercise. Some producers put the feed and water at different ends of the pen or pasture, so bulls have to walk. They need to be fit before the next breeding season so they have adequate endurance and can cover their cows early in the season," he says. You don't want bulls too soft and fat—with no stamina—after their winter "vacation". Bulls should not be underfed or overfed; they need optimum condition to have enough ambition and stamina to cover the cows.

They do need to be fed a little extra during winter, however, to have enough energy to keep warm during cold

weather. Weather severity and climate in your area will determine how much extra feed the bulls will need. If bulls come out of the cow herd a little thin after breeding season, some producers tend to over-feed them when picking them back up in flesh again. “The fat layers around the scrotum insulate the testes and can interfere with proper thermo-regulation of the testes. The sperm parameters and sperm production will be adversely affected in overfed bulls. This is why lean-to-moderate body condition is better than over-fat bulls,” he says.

Avoiding over-feeding is also important for health reasons. “Too much grain in the diet can lead to acidosis and liver abscesses, or foot problems,” he says. Also make sure feeds don’t contain endophyte-infected fescues or other plants that act as vaso-constrictors, which interfere with circulation to the extremities. Cattle have been known to lose ears, tails and have foot problems during cold weather, when eating certain feeds. “This interference with adequate blood circulation can also have an effect on the testicles and sperm production, affecting thermoregulation,” says Kasimanickam.

Windbreaks for the bulls are important. “During cold weather in winter, there can be adverse effect on the testicles if bulls can’t get out of the wind. Scrotal frostbite adhesions may be temporary or permanent, depending on the severity of frostbite. This will hinder the bull’s ability to raise or lower the testicles for proper thermoregulation, and this can dramatically and adversely affect sperm production and parameters,” he explains.

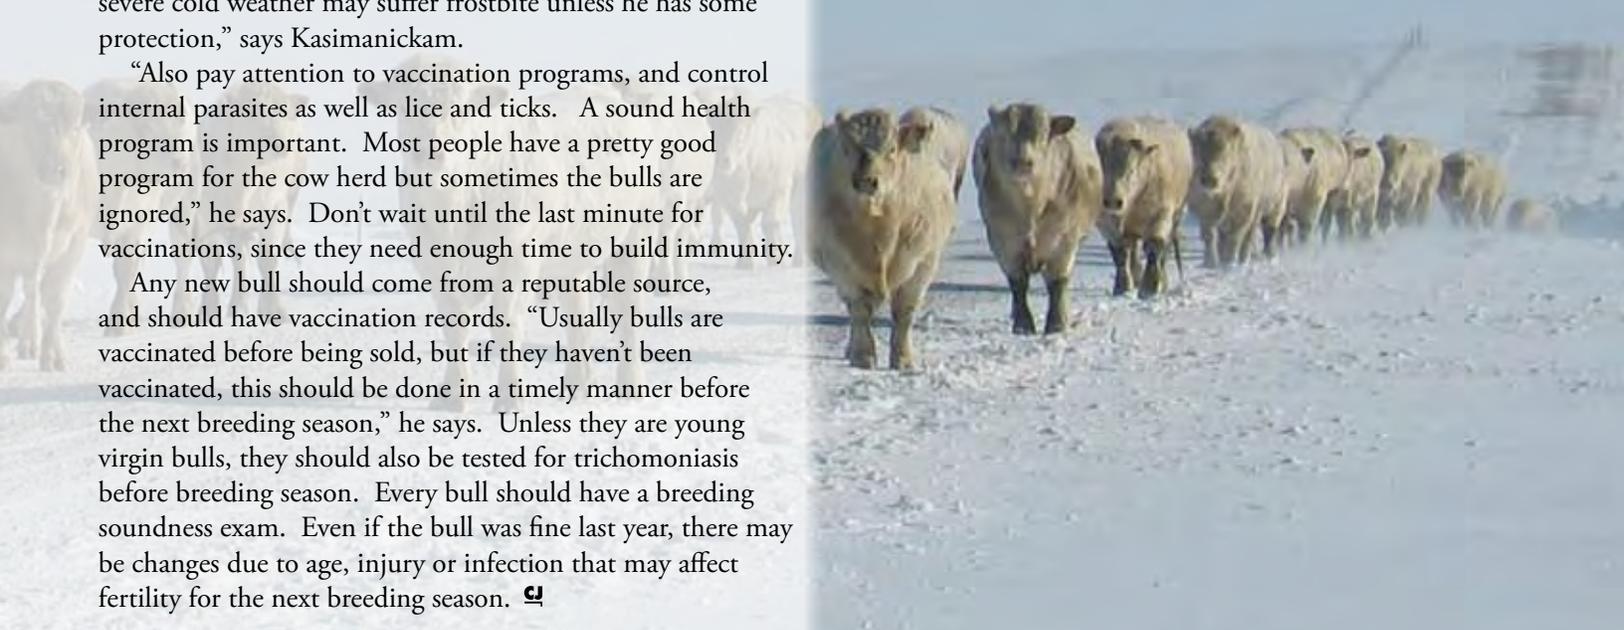

“If it’s mild frostbite, there is good chance for recovery before the next breeding season. If it’s severe frostbite the bull may not recover and won’t be fertile—and must be replaced. Prevention is best. Make sure bulls have windbreaks and bedding. Some people pile up old hay and straw for bedding. Heat from fermentation in these piles will help the bull stay warmer in cold weather. Any bull that is exposed to severe cold weather may suffer frostbite unless he has some protection,” says Kasimanickam.

“Also pay attention to vaccination programs, and control internal parasites as well as lice and ticks. A sound health program is important. Most people have a pretty good program for the cow herd but sometimes the bulls are ignored,” he says. Don’t wait until the last minute for vaccinations, since they need enough time to build immunity.

Any new bull should come from a reputable source, and should have vaccination records. “Usually bulls are vaccinated before being sold, but if they haven’t been vaccinated, this should be done in a timely manner before the next breeding season,” he says. Unless they are young virgin bulls, they should also be tested for trichomoniasis before breeding season. Every bull should have a breeding soundness exam. Even if the bull was fine last year, there may be changes due to age, injury or infection that may affect fertility for the next breeding season. 

PECKING ORDER – If a group of bulls will be spending the winter together, they soon have the pecking order figured out and there’s not much fighting after that. To avoid injuries, put them all together on the same day, or as soon as possible. This is actually easier on them—as they all fight one another, and no one bull gets picked on. If you keep adding bulls to a group, the newcomers are ganged up on by the ones that are already there, and may be run to exhaustion.

It can be detrimental to add bulls later, because this upsets the whole social order. You may need to keep yearlings and new bulls separate for a while, especially if the yearlings need better feed than the older ones, to regain weight while still growing. If you put them with older bulls later, usually the old bulls tend to leave the young ones alone. The young ones are more timid and don’t challenge the bigger bulls as aggressively as they would their peers. The young bulls are fairly agile and athletic and are good at getting out of the way of the older bulls, so they are less apt to get hurt.

CHAROLAIS CALVES MODERATE BIRTH, MAXIMUM GROWTH.

Fact  Fiction?

Fact!

The AICA Performance Database indicates average birth weights for bull calves decreased from 92 pounds in 1990 to 89 pounds in 2010, while weaning and yearling weights increased 37 pounds and 74 pounds during the same 20 year period.* Similar results are supported by data collected through research at the Meat Animal Research Center (MARC) which show a moderate 8-pound difference between Charolais-sired calves and British-sired calves. Get the facts before making your next herd sire purchase.

We are Excited for the Future

M6 Ms 761 Nancy 6100 P^{ET}

Sire: WCR Sir Duke 761

Dam: M6 Ms H45 Nancy 382 ET

EPDs: 2.4 2.4 37 69 18 36

A very successful and proven donor cow. A daughter sold for \$9,500 in the M6 Spring Sale. This past fall, 1/2 interest sold in her son for \$15,000 at M6. With her pedigree and strong EPDs, we expect big things from this donor in the future. 2013 calves by Keys Ten-Acious and Cooley Royce.

Co-owned with Double-H Charolais.

NGC Sara Lee 610S TW

Sire: LT Western Spur 2061 Pld

Dam: LPC WZD Sara 3061 Pld

EPDs: 0.9 0.3 20 41 0 10

The most proven and successful donor we have ever had. Sara Lee is the dam of NGC Show Off, 2011 Minnesota State Fair Champion and 2012 Black Hills Stock Show Reserve Champion. She is also the dam of our 2012 Iowa Beef Expo high-selling open heifer. Look for her Ten-Acious calves at winter sales. 2013 calves by Sparrows Sanchez, Monopoly, and DA Cash.

2H Wildflower 017X PLD ET

Sire: LT Wyoming Wind 4020 Pld

Dam: OBG Elvira 4303 Pld

EPDs: 6.0 0.5 25 44 4 16

She stems from one of the Charolais breed's most dominating showing cow families. Her dam won Junior National and became Show Dam of the Year. She then produced a daughter that not only won Junior National, but came back the following year with her first calf and was named Reserve Champion. Wildflower was Division Champion at the Iowa and Minnesota State Fairs. We are excited about the future of Wildflower.

Co-owned with 2H Cattle Company.

**A special thanks to everyone
who supported us in 2012 as we
look forward to an exciting 2013!**

We are already getting embryo requests on this 2 year old daughter of the great 248 cow. Being sired by the 7 time Grand or Reserve Champion Mahalo brings in the Metallic cow family as well. Tipper ranks in the top 4% of the breed for weaning weight EPD and top 5% for yearling weight. Her maternal brothers have sold for \$170,00 and \$50,000 plus she is a maternal sister to Bodacious. Owned with Brad Rostad of Jamaica.

Embryos for sale by Fire Water 5792RET or we will flush her to the bull of your choice.

Make plans to attend the Livestock Exporting 201 seminar, Feb. 19, 2013.

Gain the tools needed to market animals abroad

JEFFERSON CITY, Mo. – The Livestock Exporters Association (LEA) will hold the “Livestock Exporting 201” seminar from 8:30 a.m. - 5 p.m. on Tuesday, Feb. 19, at the Hilton Kansas City Airport in Kansas City, Mo., in conjunction with the United States Livestock Genetics Export (USLGE) annual meeting.

Experienced exporters, LEA members and industry affiliates interested in marketing livestock abroad will benefit from the day-long, in-depth discussion of the export process. This year’s seminar program will expand on the topics covered in “Livestock Exporting 101,” which was held last February. Areas to be covered include shipping cattle, swine, horses, sheep and goats by air; shipping cattle by sea; collecting international payments and changes the USDA has made to the livestock export process. The event will also serve as a great opportunity to network with livestock export service providers and others involved in the industry. Those new to the export industry are encouraged to attend.

“This can serve breeders who are actively trying to get involved in the export process, as well as people who could potentially provide services involved with the exporting process such as livestock trucking companies, people who are interested in having their farms used as quarantine facilities and veterinarians wanting to become more familiar with their role in the export process,” LEA President Tony Clayton says.

In addition to the program, attendees can visit with numerous vendors on display, offering a wide range of services related to the marketing livestock abroad.

Clayton encourages anyone with an interest in marketing livestock, including seedstock producers and breeders, veterinarians and freight providers, to attend the seminar to learn the latest information on the ever-changing world of live-animal transportation in the United States and learn about programs that can be used to promote their goods and services to the international livestock community.

Advanced registration begins Dec. 3. The cost of the seminar is \$150 for LEA members and \$200 for nonmembers. The registration fee includes all meals for the day and a copy of the proceedings. To register for the event, contact Judy Baker of LEA at 937.548.4261 or livestockexportersassn@earthlink.net. For more information regarding LEA and marketing livestock abroad or to register online, visit the LEA website at www.livestockexporters-usa.com.

For more information contact:
 Tony Clayton, LEA President
tony@claytonagri-mktg.com
 or 573.659.8560

About Livestock Exporters Association

Livestock Exporters Association (LEA) is comprised of the livestock exporters, freight forwarders and service providers that export the majority of U.S. livestock nationwide. The association cooperates with USDA APHIS VS to develop health and export agreements abroad, while fostering relationships between exporters and a network of service providers. For more information on LEA, visit www.livestockexporters-usa.com.

Controlling Lice in Beef Cattle

By Heather Smith Thomas

Lice are a common winter problem. Heavy infestations of these tiny parasites rob nutrition from cattle just when they need it most. A lice-infested animal may lose weight and/or become more susceptible to disease. Stockmen in regions with cold winters try to control lice populations.

Dr. Lee Townsend, Extension Entomologist, University of Kentucky, says there's not much that's really new for lice control. "Standard treatments are still pyrethroid insecticides, which are effective against all types of lice," he says. Systemic products like ivermectin and moxidectin kill sucking lice (that ingest blood) but won't kill chewing lice.

Townsend says diligent lice control can effectively get rid of lice in most herds. He cites a European study that looked at attempts to eradicate both sucking and chewing lice in herds. Elimination was successful in 85% of the study herds (28 out of 33 herds). "The strategies they used included application of insecticides, utilizing two treatments three weeks apart, culling any animals that appeared to be carriers (reservoirs of lice), and quarantine/treatment of any new animals brought into those herds," says Townsend.

Lice were seen again in 5 of the 28 herds within 3 to 6 months after treatment, and were back in 9 of the 28 herds within a year. "Factors associated with re-infestation of lice included purchase of livestock (bringing lice-infested animals into the herd), failure to treat newly introduced animals or missing one of the two treatments, and mixing treated with untreated cattle due to fencing problems," explains Townsend.

If a producer doesn't make sure all the animals on the farm

get treated, or fails to follow up with the second treatment, there will be residual lice population on some animals and they pass lice to the rest of the herd. "Giving two treatments 3 weeks apart is an important key. Most products don't work against the egg stage. The first treatment should get most of the active lice--the adults and nymphs," he says. Eggs on the hairs will survive, however, to hatch later.

If you fail to treat even one or two animals with the second treatment, eggs on their hair coat will hatch and become a

source of reinfestation for the entire herd. "Signs of infestation may be subtle at first. You may not notice lice until there's a large population—when the cattle start rubbing and scratching," he says.

"If there are several hundred lice per animal and you only get 90% control with a certain treatment, this leaves enough lice to start the infestation again," says Townsend.

In cold weather, when cattle are rubbing/itching instead of eating, or losing the insulating protection of their hair coat—rubbing out patches of hair—lice control is cost effective. "Lice cost money in terms of extra feed required by the cow. The animal has stress from cold weather, stress from lice, and a few other things, and it all adds up. Separate small stresses by themselves might not make much difference, but together they do," explains Townsend.

"The reputation of the cattle producer—having healthy animals that have had their vaccinations, deworming and parasite treatments—is another consideration. If you purchase calves or replacement heifers, you want to be confident that they won't be bringing an unwanted problem into your own

If a producer doesn't make sure all the animals on the farm get treated, or fails to follow up with the second treatment, there will be residual lice population on some animals and they pass lice to the rest of the herd.

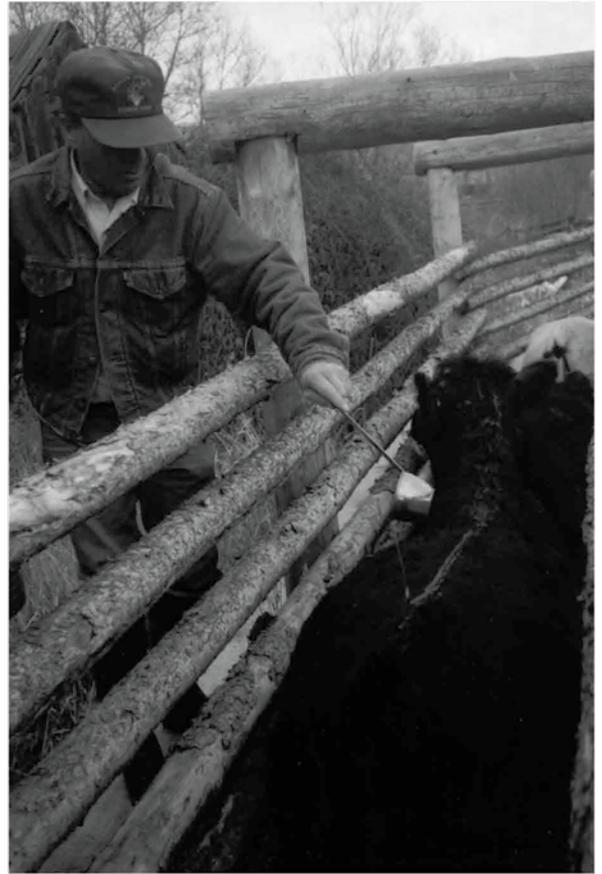

There are always some animals in the herd that never have many lice, and some individuals that have less resistance and act as carriers.

herd.” The animals also look better if they have a healthy, full hair coat rather than ragged bare patches from rubbing.

Some of the methods that allow cattle to self-medicate with back rubbers or dust bags can help control lice in late winter. A fall treatment (pour-on or systemic product) will often reduce lice numbers for several months but they start building numbers again before spring. “The self-treatment methods can supplement lice control, in a manner that eliminates labor and handling cattle again,” says Townsend.

Producers should figure out ways that work for their own operation and facilities. “There’s enough differences in how people handle cattle and what they do with them during winter that there is no one answer to lice control. Having a plan to deal with lice within your own management system is important,” he says.

There are always some animals in the herd that never have many lice, and some individuals that have less resistance and act as carriers. “Younger animals tend to have heavier infestations, which may mean they have not yet developed much resistance to lice,” says Townsend. A producer buying calves or replacement heifers is receiving animals with greater potential to be infested, with less resistance to lice

Black & White	1x	11x
1 page	\$700	\$600
2/3 page	510	450
1/2 page (h)	395	340
1/2 page (v)	450	370
1/3 page	270	220
1/4 page	215	180
1/6 page	155	130
1 inch	35	30
Position pgs (1-7)		1,150
Inside Covers		1,200
Back Cover		1,300

CLASSIFIEDS

Prepaid.

Rate: \$1 per word, \$25 min., paid in advance. Deadline 25th of the 2nd month preceding publication

COLOR

1 standard additional color	\$175
- red or blue (availability basis)	
1 non-standard color	275
- (availability basis)	
4-color	475
Special color	475
Metallic color	600

ADDITIONAL CHARGES

B/W photo (each)	\$15
Color photo (each)	50
4-Color page correction after approval (per page)	150
B/W or 2-Color page corrections after approval (per page)	100
After deadline charge	100

Difficult ads requiring substantial extra production time will be charged a minimum \$50/hour rate. If you prefer no extra charges, request that the Journal staff simplify the ad if necessary at their discretion.

CANCELLATION POLICY

Charges dependent upon stage of production will be invoiced to advertisers who cancel previously submitted advertising.

DISCOUNTS

A 5% discount for all advertising will be given if prepaid for one year. No agency commissions allowed on breeder rates.

CLOSING DATES

All advertising copy (including photos) must be in the *Charolais Journal* office by the 25th of the second month preceding publication, i.e. Jan. 25 for the March issue or the first working day thereafter. A \$100 late fee will be applied to all late advertisements. Proof deadline: 20th of the second month preceding publication, i.e. Jan. 20 for March issue.

ADVERTISING CONTENT

The *Charolais Journal* reserves the right to refuse any advertising or copy at its sole discretion. The *Charolais Journal* assumes no responsibility for the accuracy and truthfulness of submitted advertising containing pedigrees or statements regarding performance. The *Charolais Journal* accepts no responsibility for the accuracy of any photographs supplied by other than its own staff. Advertisers shall indemnify and hold harmless the *Charolais Journal* for any claims concerning advertising content as submitted.

REPRINTS, CATALOGS AND BROCHURES

Advertising and editorial reprints available. Sale catalogs and brochures are produced at special rates. Contact office for prices.

Notice to advertisers: Advertising for sales scheduled prior to the 20th of the month of publication accepted at the advertiser's risk. The Charolais Journal assumes no responsibility for distribution.

Betting our brand on your success...

For over three decades, Charolais breeders from around the country have incorporated the Lindskov-Thiel cow families and bull battery into their herds. By keeping our focus on udder scores, structurally sound feet, temperament, calving ease, productive female lines and uncompromised customer service, we're working to make sire selection at L-T a rewarding experience for you. Our approach to raising herd bulls gives you confidence to invest in your success. *We're betting our brand on it.*
