Give Us A Call For Your Fall Calving Bull Needs!

WCR MATERNAL POWER

This fall we will be bringing home 157 bred heifers, 360 bred cows, and 225+ open heifers for the replacement pen. These females are the result of 66 years of a complete program approach to produce well structured, good footed, docile, high-performance cattle. You have seen these well-balanced females produce elite Charolais bulls for both the seedstock industry as well as the commercial operations that have relied on the WCR brand for generations. They are the factory that sustains our livelihood. Mid-October we will release a listing of cows, bred heifers, and open heifers that will be available for private treaty, on a first come basis. Our family welcomes you to the plains of east central South Dakota to see these females for yourself along with the next generation of WCR bulls currently on test.

DON'T LEAVE PROGRESS...OR POUNDS...ON THE TABLE

technology is a necessity

Brett Spader
Executive Vice President

“THE BEEF INDUSTRY HASN'T BEEN LEFT BEHIND, BUT WE DO HAVE ROOM FOR PROGRESS. AND YOU HAVE TO ASK YOURSELF, IF WE DON'T TAKE ADVANTAGE OF THE TECHNOLOGIES THE INDUSTRY HAS MADE AVAILABLE, ARE WE LEAVING POUNDS, QUALITY AND MARKET SHARE ON THE TABLE?”

It's hard to wrap my mind around the fact that a little more than 80 years ago, horses were quite literally the horsepower on the farm. Today, those tractors that have only been farm mainstays for the past 70 years can drive themselves. No one would argue that we've come a long way, and U.S. agriculture has made progress in every sector.

The beef industry hasn't been left behind, but we do have room for progress. And you have to ask yourself, if we don't take advantage of the technologies the industry has made available, are we leaving pounds, quality and market share on the table?

The Tech Why: Efficiency. Sustainability.

No matter how you'd like to define these terms, the beef industry has been doing more with less every year since the 1950s when imported animals complimented the genetics of the U.S. herd – a progress milestone the Charolais breed is proud to have a large role in. Today, when we think of technology, AI (the other AI) and smartphones might come to mind, but in the 1950's the influence of Charolais genetics was the new technology many producers moved their herds forward with. Technology isn't necessarily something you hold in your hand or flip the switch on. Technology is also the application of scientific knowledge for practical purposes within an industry...and most industries would be hard pressed to share more scientific knowledge than the beef industry has access to. The opportunity is there in terms of current AICA offerings in genomic advancements, digital marketing tools, new communication means and transparent and accessible animal data. The great news is, our organization will be bringing even more advancements in the upcoming months to the membership to continue to keep Charolais genetics vital to the beef industry for decades to come.

Since the 50's, the cumulative adoption and use of technology in the beef industry has significantly improved cattle and operational efficiency. It has also decreased the inputs – land, feed and labor, namely – that it takes to produce a pound of beef. You don't have to dig very deep to find the definition of sustainability on farms and ranches across the U.S. Today, the beef industry can attribute a 67% increase in beef produced per head between 1961 and 2022 to four technologies: growth promotants, nutrition, EPDs

and improved reproduction management. As an industry, we produce about 18% of the world's beef with only 6% of the world's cattle. That's the definition of successful efficiency.

But could we do better by increasing the technology we're employing? In the next 30 years, we're going to have to figure out how to do better – the population isn't getting any smaller. We've all heard the “by 2050” commentary and holding U.S. beef market share throughout that increase should be a goal we all have our eye on.

Technologies for Herd Advancement

It's irreverent for the industry to place any technology above the work that has gone into genetic advancement. From EPDs to genomics, beef producers are increasingly utilizing data to make more informed breeding decisions. The adoption has moved the beef industry forward by promoting improved feed conversion, disease resistance and the domestic and foreign meat quality characteristics that are not only securing but increasing our foreign export opportunities. Yet other technologies are positioned to advance our industry even further.

The future of beef production is at our fingertips.

Today, 3D imaging and machine learning are being used to predict liveweight and carcass characteristics of live on feed beef cattle. For any producer selling on the grid, I don't have to highlight what this means for the opportunity and information you have access to before that animal hangs. The advantages are limitless for the beef industry and will revolutionize how animals are valued and marketed. Artificial intelligence also can't be overlooked. Predictive analytics driven by AI algorithms are already analyzing what was once thought to be infinite amounts of data to predict market trends, optimize feeding strategies, and forecast potential health issues. Automated monitoring and virtual fencing are also on the horizon for large-scale implementation. There's certainly nothing boring about beef industry technology! As producers, however, we have to take a look at where we've come from, where we are today and where we want to be in the future. We have to figure out what fits our operation, what doesn't and commit to advancement.

In 2024-technology isn't a trend, it's a necessity.

American-International CHAROLAIS Association

The AICA is the official registry for Charolais and Charbray cattle in the United States. Charolais cattle were first brought to the U.S. in 1936. In 1957, the American Charolais Breeders Association and the International Charolais Breeders Association merged forming the present AICA.

Membership in the AICA is obtainable when the applicant has ownership in at least one animal, and has paid the initial membership fee of \$125. AICA annual dues are \$100.

Year letter for 2024 is M

Record your 2024 born calves using AICA's online system. Add the data as the calves are born; continue to update the records as you add weaning and yearling data. Register the calves at any time by adding their name.

Performance Deadline Approaching

Performance data must be submitted to the AICA office by September 15 to be included in the October 2024 Genetic Analysis. Please make sure calf data, weights and weigh data have been submitted online or on forms to AICA.

PA Policy as of 9/1/24

Donor dams and AI sires born after January 1, 2020 are required to be tested for Bovine Progressive Ataxia (BPA), prior to the registration of progeny and/or additional progeny. Animals that have a 100K DNA result on file, will only need to have the BPA test added to their profile. Animals without a 100K on file, will need to have the 100K and BPA ran.

Fall AICA Board of Directors Meeting, October 27-28

The AICA Fall Board of Director and Committee Meetings will be held Sunday, October 27 and Monday, October 28 in Kansas City. See page 72 for more details.

Expedited Registration Work - NEW FEES

If an animal needs to be registered with in a day or two a rush fee of \$75 (\$150 non members) will be added to work. Once the animal is registered you can pull it up online to view the registration number. The new certificate will be mailed out the following day. We also offer FedEx mailing for additional \$75 (\$150 non members).

ONLINE TIPS

Transfers cannot be done on-line if the paper has already been issued. The original paper must be returned to AICA. Animals registered on-line can be held in the system for transfer or print later. Many members find it helpful to hold all the newly registered animals in the system. No need to chase papers around.

When using a non-Charolais parent, follow the example given on the entry screen. For a non-Charolais female type FNF-XXXX, for a non-Charolais male type FNM-XXXX. You may also use breed codes to indicate the breed of the non-Charolais animal but be sure to use 4 digits (example: FNM-ANAN). We can add the pedigree of your other breed animal but need a copy of the pedigree 1st. The fee to add a pedigree is \$20.

Be sure to click the "register" box and the "save" button at the bottom of the registration screen if you want the animal registered. The registration number will pop up in the middle of the screen or you'll get an error message telling you what boxes you have missed.

Online Payment for AICA

Online bill pay is now available to all active members. Once you are logged into www.charolaisusa.com, you will go under "My Account" then "Account Payment."

Online Payments for CPI

Online bill pay is now available to all CPI members. You will receive a monthly statement from our accounting department. Just a quick tap of "View & Pay Invoice" and you will be prompted to a second screen to enter your debit or credit card info.

Export Your Data for Sale Catalogs

Under the "tools" tab, you will find a new "Data Export" button. This data export gives you the flexibility to export data on animals in your herd and use those data files in your own management packages. You can download and save the files directly to your computer in a CSV (can be opened in Excel) format. There are many options within this feature including selecting the type of animal to export and specific data.

CHAROLAIS SPOTLIGHT

ELZIE THAYNE (9) AND BRACKYN THAYNE (10), ALTONAH, UTAH

Tell us about yourself.

Elzie – Hi! My name is Elzie Thayne, and I'm nine years old. I live in a little town called Altonah, Utah. I love being outside, going fishing, and riding my bike. I like showing my steer, Fergie, and my Charolais heifers.

Brackyn – Hi! My name is Brackyn Thayne, and I am ten years old from Altonah, UT. I've been showing Charolais heifers since I was 5. My favorite color is pink, and I love playing softball. I will be in 5th grade this year!

How did you get into showing cattle? And more specifically Charolais?

Brackyn – My parents started raising Charolais in 2017. When I was five, I wanted to start showing in our Jackpot series. Our most gentle heifer was a Charolais named Daisy. I went into the ring by myself with her. I was hooked! Since then, I have gone to more shows each year. I've met some fun people who have been a great help to me. I enjoy raising and showing Charolais cattle so I can spend time with my siblings, cousins, and friends.

Elzie – I live on a small Charolais cow-calf operation. My first show heifer was a Charolais we raised, and I named her Valentine. I was able to take her to jackpots around Utah and Idaho. She helped me win my first buckle. One weekend we went to a jackpot with three shows, and I won three showmanship buckles with her. I like to show Charolais because it's fun to be different. It is what our family raises, and I want to keep the herd going.

What gets you out of bed in the morning? What's your why?

Brackyn – I am very competitive. I like to work hard because it pays off in the end and helps me do better in the show ring. I try to be consistent, even with the little and simple things.

What is one thing you'd tell somebody to get them involved in our breed?

Elzie – Showing Charolais has been so much fun for me. Charolais are my favorite breed! I would tell everyone that they have been our gentlest cows, and they raise the biggest calves every year.

You've been allowed to create the highest quality show heifer ever made, what does she look like?

Elzie & Brackyn – She would be white of course! She would be feminine fronted, big bellied, big hipped, sound moving and fun to be around. She would also have good hair and a lot of it.

What is your favorite memory in the show ring?

Brackyn – My favorite memory in the show ring was with my heifer Angel at the Char Spangled Banner Junior National in Minnesota last year. Angel was only 6 months old, and it was only her second show. I was lucky enough to win Reserve Junior Showman while showing her. I was so shocked, and it was such a fun day. It is something that I will remember forever!

Elzie – We went to the NILE in Billings, Montana last October. We weren't sure if we should take my big, bred heifer or not, but we decided to pull her out of the field a week before. Her name is Eve, and she ended up winning her division. Up to that point she never really stood still for me while I was showing her. She liked to dance around in the ring, but that day, we finally connected, and she showed so good for me.

What are you most looking forward to at the Greatest Show in Springfield, MO?

Elzie – I am excited to be able to show a heifer out of my previous show heifer, in the bred and owned show next year.

Brackyn – I am excited to see our friends and for showmanship. I hope to make it to the final round again. 🐮

Five considerations to fuel fall-born calves' health

The timing of calving seasons has tradeoffs, but fall calving is gaining in popularity in many parts. A University of Tennessee study compared 19 years of data from spring-calving and fall-calving herds, and it found the fall calving season to be more profitable than spring calving.¹ The higher prices of steer and heifer calves captured by fall-born calves were able to cover the higher feed expenses and lighter weaning weights of the fall-born calves.

It's important to weigh the pros and cons based on your situation, and keep in mind that managing fall calvers is different than spring calvers. From a health standpoint, here are five considerations.

1. Prepare for passive protection

While fall typically offers better weather conditions for calving, high temperatures can pose stress. Calves will likely have to endure fluctuating weather as fall turns to winter. Vaccinating cows prior to calving with a scours vaccine such as BOVILIS® GUARDIAN® will stimulate antibody production and result in higher-quality colostrum. Ensure adequate colostrum; calves need about two quarts of colostrum within four hours of birth and one gallon within 12 hours.²

2. Vaccinate early against viral and bacterial threats

An intranasal vaccine helps provide disease protection at a young age while also avoiding the potential risk of maternal antibody interference. BOVILIS® NASALGEN® 3-PMH is the first intranasal vaccine to protect against both viral and bacterial pneumonia. The modified-live vaccine protects against five of the major causes of bovine respiratory disease (BRD) and can be given to calves as young as one week of age.

3. Don't forget to deworm

Calves are highly susceptible to the detriments of parasites simply due to their lack of exposure. Internal parasites can decrease feed intake and impact immune function, including response to vaccination. Before turnout on winter pastures, deworm the cows and calves. Not all dewormers are created equal. SAFE-GUARD® (fenbendazole) offers several formulation options — all demonstrating a median efficacy above 99.7%.³

4. Preconditioning is worth it

A 2023 dataset from Superior Livestock Auction showed that VAC45 calves vaccinated with two doses of clostridial, two doses of five-way modified live virus and at least one dose of a *Mannheimia haemolytica* and/or *Pasteurella multocida* vaccine, and weaned at home for 45 days before delivery, added \$7.86/cwt compared to those receiving only one dose of vaccines and weaned at shipping.⁴ The calves also weighed more.

5. Fine-tune treatment protocols

Talk to your veterinarian to develop a plan to reduce disease incidence and severity. Knowledge of previous antibiotics used is important, as your veterinarian may choose a different class for this treatment. They may also recommend using a nonsteroidal anti-inflammatory drug (NSAID) to address fevers caused by BRD.

IMPORTANT SAFETY INFORMATION FOR SAFE-GUARD:

CATTLE: Do not use in beef calves less than 2 months old, dairy calves and veal calves. A withdrawal period has not been established for this product in pre-ruminating calves. Additionally, the following meat withdrawal and milk discard times apply: **Safe-Guard/Panacur Suspension:** Cattle must not be slaughtered within 8 days following last treatment. For dairy cattle, the milk discard time is 48 hours. Do not use in beef calves less than 2 months old, dairy calves and veal calves. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in dairy cattle at 10 mg/kg. **Safe-Guard Paste:** Cattle must not be slaughtered for 8 days. For dairy cattle, the milk discard time is 96 hours. **Safe-Guard Suspension:** Cattle must not be slaughtered for 8 days. For dairy cattle, the milk discard time is 48 hours. **Safe-Guard ENPROAL Type C Medicated Block:** Cattle must not be slaughtered for 11 days. For use in beef cattle only. **Safe-Guard 20% Protein Type C Medicated Block:** Cattle must not be slaughtered for 16 days. For use in beef cattle only. **Safe-Guard Type A and other medicated feed products (pellets, cubes, free-choice mineral, or free-choice liquid):** Cattle must not be slaughtered for 13 days. For dairy cattle, the milk discard time is 60 hours

GET TO KNOW YOUR DIRECTOR

Makennah Tucker, Area 1

Makennah Tucker
Area 1

Hello! I'm from Briggsdale, Colorado, where I raise Charolais cattle and a few registered Maine cattle. I'm currently a Junior at Oklahoma State University, majoring in Agricultural Education and Animal Science. I grew up playing volleyball and basketball and participated in various 4H projects before focusing on the two I was most passionate about: cattle and pigs.

Outside of the show barn, what else are you up to?

Outside of my own show barn, I spend a lot of time at Griswold Cattle's show barn. Working at GCC keeps me busy, but when I'm not with the cattle, I enjoy playing intramural volleyball with my friends, attending youth groups, and participating in Collegiate FFA at OSU. I also love going to the movies and driving around town with friends. However, my favorite activity outside the barn is attending OSU football games. Go Pokes!

What do you want to accomplish with your time on the AIJCA Board?

I would like to increase involvement from juniors in activities at Junior Nationals and build stronger relationships with them and their families. The best way to achieve this is by learning how to connect with them, letting them know they are welcome to attend and participate in activities, and showing them that their presence is appreciated. Additionally, I aim to boost Area 1 involvement and foster stronger connections with participants from this area. I want members from Area 1 to feel comfortable reaching out with any questions about shows or other needs. If I don't have the answers, I will guide them in the right direction through open communication.

Tell us about your 1st Junior Nationals

My first Junior National was in 2018 in Des Moines, Iowa. Aside from the National Western Stock Show, it was my first major show, and I was quite nervous going in. However, I quickly discovered that I was welcomed with open arms and made many friends. I played basketball outside in the Iowa heat and humidity, and afterward, we had a water fight. That experience solidified my desire to become more involved in the Charolais breed. The people in the breed are amazing, and as I learned more about cattle and what makes a good production animal, I came to believe that Charolais have the best qualities of all breeds with their muscle mass, growth ability, and feed efficiency.

What would you say to someone interested in joining the Charolais breed?

I would tell them that Charolais cattle aren't as hard to keep clean as most people think! More importantly, I would emphasize that the people in the Charolais breed are some of the best you'll ever meet and have the opportunity to work with.

How can we use our platform for good?

We can use our platform to advocate for agriculture, particularly the beef industry. By attending conferences, learning more about the Charolais breed, and understanding the practices of successful producers, we can share valuable insights with our family, friends, community, and junior members.

Social media is a powerful tool where many people get their news and information. We can leverage it to spread the word about the beef industry and the Charolais breed, showcasing what we do, how we do it, and why we do it.

Raising cattle for beef production is not a get-rich-quick scheme or something anyone can easily do. It requires hard work, dedication, determination, and a passion for the industry. Without this passion and our commitment to animal care, we wouldn't be successful. By using our platform to highlight these aspects, we can show the world what we are truly about.

Generations of Proven Performance

Valued Customers and Friends,

On behalf of the Ricketts Charolais Ranch we would like to welcome you to the complete dispersal of the Ricketts Charolais Ranch cow herd. As you look through the catalog you will find Rex and his family have spent their life devoted to the improvement of the Charolais genetics they produce. Rex was always devoted to combining genotype and phenotype to make a product which fit both sides of the spectrum. Rex served as a mentor as well as a true friend to all his Charolais family and his Agriculture family. Devoted to help youth develop and find their place in production agriculture. As you study these pedigrees you will notice many of these genetics have stood the test of time, many of them come from Sondra's family which were pioneer Charolais producers in the northwest Missouri some with more than 10 generations of the same family genetic selection. So, buy with confidence you are buying genetics which will work and have been developed to perform, be productive, and have superior carcass with multiple generations of the select matings. As you can see this program has been devoted to the improvement to the breed with a product that will continue to keep the cow working for the producer, not the producer working for the cow. The Ricketts family would like you to join them for comradery and fellowship for the dispersal of the herd of cows they loved to produce. Furthermore, he loved the relationships and the valued friendships which were developed and cherished thought the building of the Ricketts Charolais Ranch. Please feel free to contact any of us with any questions ahead of the event.

Rex & Sondra Ricketts

Sincerely,
Brett Sayre

Rex E. Ricketts Memorial Scholarship

Rex was a revered educator and pillar in his community and the agricultural industry. A cherished University of Missouri professor emeritus of Animal Science, Rex left an indelible mark on the world around him.

Rex was inducted into the AICA Hall of Fame on April 24, 2024. He served the AICA for over 22 years as Chairman of the Breed Improvement Committee, helping to revolutionize the science of methodology for producing quality Charolais cattle.

A scholarship is being established with the American Charolais Foundation for Junior Charolais members. Visit: <https://charolaisusa.com/american-charolais-foundation.php> for details.

Donor dams and AI sires born after January 1, 2020 are required to be tested for Bovine Progressive Ataxia (BPA), prior to the registration of progeny and/or additional progeny. Animals that have a 100K DNA result on file, will only need to have the BPA test added to their profile. Animals without a 100K on file, will need to have the 100K and BPA ran.

2024 World Charolais Congress • Canada

As seen thru the eyes of Candace By,
August 2024 Charolais Banner

The 2024 World Charolais Congress started in Ontario on June 21 with guests arriving from Australia, England, Estonia, France, Hungary, New Zealand, Sweden, United States and Wales. The airline pending strike and cancelled flights made arrival times unpredictable, but thankfully, all arrived with luggage!

Our welcome dinner was filled with jovial hugs with people meeting after years apart and new introductions. The chatter and excitement in the room was exceptional.

The Canadian Hosts: Darwin Rosso, Canadian Charolais Association (CCA) Board member; Craig Scott, CCA General Manager; Helge & Candace By, Charolais Banner

Our first stop on day two was at St. Jacob's Market where everyone wandered through the wide variety of market offerings and many were tempted to try the apple fritters and butter tarts. Throughout the trip, we offered everyone flavours unique to Canada as food is part of the travel experience. Maple leaf shaped maple sugar candies were shared after lunch and well received.

Rollin' Acres Charolais hosted the group in the afternoon with participants from the Uppin' the Ante sale group. Cattle were on display in their barn and in a field close by. The hospitality was great and a band played later in the afternoon and during dinner. It poured rain for a short time, but everyone had time to study the cattle and visit with the breeders. Thank goodness we had shelter. The slow roasted beef, double

John Gibson, Missouri (right) and Colin Rex, Charolais Society of Australia General Manager presenting hospitality gifts at Rollin' Acres

baked potatoes, salads and vegetables, topped with pie made for a terrific meal and everyone was quite content on the way back to Toronto.

Day three was hosted by the Ontario Charolais Association and Cedardale Charolais. With lunch at Cedardale with rice krispie cake as dessert, we realized that it is a North American thing. We had to tell some of our guests to pick the squares up and bite them as they were trying to cut them as they would other desserts.

Swain Beef Farms toured us through their operation and feedlot. They were very open about the challenges they

face living close to an urban population and their environmental stewardship was admired. There was good discussion and many questions.

Cedardale Farms toured us through the countryside and talked about crops in the area, while we bused to pastures with cow/heifer calves and cow/bull calves. Southview Farms, M&L Cattle Co. and Burgomaster Agri Marketing had displays at Cedardale which everyone visited. We were once again graced with good music by

an exceptional fiddle player. Smoked brisket and caramel glazed ham were on the menu and many other breeders were on hand to visit with the internationals. The OCA presented each guest with a bag of swag as we loaded the buses to return to Toronto.

On day four, one of our bus drivers offered us a more scenic drive into the Niagara area sharing information and history, with a couple of quick stops for photos. Niagara Falls Power Station and Tunnel tour were enjoyed and the awe of the Falls was a definite highlight. For many people, seeing Niagara Falls

Swain Beef Farms Feedlot

was a real bonus for the trip. We had lunch at the Queen Victoria Place Restaurant overlooking the Falls. "If we had come to the Falls on our own, we would have come to the American side and we wouldn't have seen the seen or appreciated the Canadian side. This was exceptional," thanked Donnie Leddy, United States.

A World Congress is meant to be a balance between tourism and cattle. We planned an itinerary that would showcase Canadian Charolais, allowing everyone to appreciate them without boring them. One livestock stop per day, allowed them to be fresh and attentive at every stop. In some cases, they even wanted to see more cattle.

Krecia & Donnie Leddy, South Dakota, at Niagara Falls

The afternoon was hosted by Miller Land and Livestock. The exceptional hospitality and frank discussion about their operation and agriculture was appreciated. Guests climbed equipment, walked around the farm, asked questions, and enjoyed an extensive charcuterie table and refreshments and a beautiful warm day. In many European countries, land ownership is ruled by family lines and government policy. People were amazed that you could buy any land you wanted in Canada if you had the money.

Supper was at the Erie Beach Hotel. in Port Dover, where everyone enjoyed a perch supper with many salads and huge pieces of pie. A short walk afforded a view of Lake Erie and some guests requested clarity that it was actually a lake and not the ocean, as they couldn't see land on the other side.

It was our last night in Toronto and we had an early flight to Winnipeg to start day five. Traveling with a family is one thing, but traveling with a group this large was something else. We were very grateful when everyone was on board the flight and even more grateful

when everyone had their luggage when we landed.

We were joined in Winnipeg by another guest from England and Robbie Chomik, who was invaluable in looking after details requiring someone to have transportation other than the bus. The Forks was a pleasant stop for lunch. It allowed everyone the opportunity to order what they wanted, do a little shopping, and wander outside through the historical sites in the area. A band was playing for the lunch crowd and it was a relaxing way to enjoy some of the day after the early morning.

Steppler Farms hosted us in the afternoon with displays by C2 Charolais, Hidden Lake Stock Farm, LEJ Charolais and Sunshine Oak Charolais. The mechanical bull created some excitement as countries competed for the championship title. Many people participated and took advantage of the opportunity they may never have again. It also gave them an appreciation for the skills and athleticism involved in the sport they would witness at the Calgary Stampede.

Brisket, baked potatoes, pea salad and cheesecake were on the menu this evening and guests had their first taste of paralizers and caesars. Some were convinced they were a good thing.

Assiniboine Park Zoo started day six and participants were in awe of the polar bears swimming overhead and beside us up close. Snowy owls were also among the animals many had never seen before.

Lunch was taco-in-a-bag, a very Canadian show circuit meal that was new to many on the bus. It was a healthier portion than we get at most shows and we received very good feedback.

HTA Charolais hosted our afternoon and hospitality was once again excellent. We toured a pasture with cow/heifer calf pairs and cow/bull calf pairs. There was discussion as to why they were separated, which gave us the opportunity to point out there would be no risk of unwanted pregnancies. This brought surprise to many as it was a visible example of our early maturing and fertile Canadian Charolais.

Other breeders displaying cattle here

John Gibson & Donnie Leddy presenting the AICA hospitality gift at HTA Charolais

were Pleasant Dawn Charolais and R & G McDonald Livestock. Paralizers and caesars were among the items on the refreshment menu and many guests took photos of the recipes for future reference. Supper was enjoyed in the Rivers Community Centre and we enjoyed perogies and sausage with a traditional roast beef supper.

Day seven started in Brandon and we had a mid-morning snack of fresh cinnamon buns from Kuipers bakery, whose slogan is "Our buns don't jiggle." Cinnamon buns are a North American thing and although many thought they were too big, they somehow disappeared.

We stopped at the Inglis Grain Elevator National Historic Site where a piece of history is well preserved. High Bluff Stock Farm had some cattle on display and were appreciated by the group.

Our son, Bartley and fiancée Larissa were on hand to serve rhubarb vodka sippers Helge and I had made for the occasion. Hamburger soup (a Canadian thing) and sandwiches were served for lunch in the Roblin Community Hall. This was the only complaint we received on the trip because they ran out of soup after many wanted seconds.

Visiting the Inglis Grain Elevator National Historic Site

World Charolais at Hunter Charolais

Hunter Charolais hosted the afternoon in their pasture. They had pens set up, bleachers for people to rest, coolers full of refreshments and some Canadian yummy treats to enjoy (ketchup chips, Hawkins cheezies and maple cream cookies). Sunblade Charolais also had cattle on display. The New Zealand guests were very interested to see some Downtown progeny as they just purchased a herdsire of this lineage. It was a picturesque, relaxed afternoon in the rolling hills. We appreciate the work all the breeders expended to make these visits relaxed and easy for the visitors to enjoy and puruse the cattle.

Smoked barbecue pork ribs were served for supper with nanaimo bars

and other slices for everyone. Everyone knows nanaimo bars are Canadian and I believe they were well received. Planning meals that were different in every location was a bit of a challenge. Every caterer wants to serve some type of coleslaw, potato salad or cesar salad. They are all really good, but a fifteen-day menu requires more variety. For the most part, we managed it. Our priority was for good quality beef as often as possible, which we considered the most important part of the meals.

Day eight's first stop was to pick up more guests from France, Czech Republic, Ireland, United States, Mexico and Canada before going to the Royal Saskatchewan Museum in

Regina. The dioramas are very life-like and depicted ancient times, early native Indian settings and wildlife within the province. Most people commented their favorite part was the native section, but guests could also be seen taking selfies with the wildlife and the world's largest T-Rex.

Lunch outdoors at The Bar Willow was slightly hindered by rain, but it was still warm enough to enjoy the setting on the lake under shelter. The braised beef short ribs were exceptional. After a brief drive through the park,

by the Legislative Building and the Queen Elizabeth II gardens, we were on our way to Moose Jaw. As you might imagine, many were in awe of the straight roads and long-distance views.

White Cap Charolais and Rosso Charolais hosted the afternoon with Elder Charolais, Wilgenbusch Charolais, Howe Coulee Charolais and Beck Farms sharing in the displays. It had been rainy before our arrival, but by supplying the internationals with plastic boots, they were all able to inspect the displays.

Hospitality is always high at this location and a caesar and gin menu was part of what was available.

The Canadian Charolais

Association supplied some apple pie vodka sippers as a welcome to the guests as they got off the bus. Ribeye steaks were barbecued for supper and many watched and took barbecuing tips home to try. Cheesecake with saskatoon berry sauce gave them another local flavour to enjoy.

We stayed at the Temple Gardens Mineral Spa where many enjoyed the healing waters. Day nine included a free morning to relax and take in some of Moose Jaw's tourist attractions or shop for some souvenirs. Fifth Avenue Collection offered a tour of the historic home that houses their home office and more shopping was available. The Tunnels of Moose Jaw were also visited as Al Capone history was explored.

Bovigen was our first official stop of the day with an informative tour of their collection facility with a hamburger lunch being served. You can't go wrong with a good homemade burger! Puffed wheat cake was served for dessert, which is definitely Canadian.

Lee Norheim, Norheim Ranching offered a tour of the livestock equipment they offer. Many climbed, inspected, pictured and asked questions about the displays. The size of feed wagons and such are definitely bigger than what is available in some countries. This was a very attentive group that took advantage of every opportunity the trip offered.

The trip to Cedarlea Farms, Hodgeville, gave everyone a little bit different view as we drove out of the Regina plains. We boarded wagons and went to inspect a pen of bred heifers before stopping in a pasture with a

Lee & Connie Eaton celebrated their 55th wedding anniversary at White Cap Charolais

Viewing cowherd at Cedarlea Farms

view of 175 cow/calf pairs running to see us in the open blue skies. It was a sight that got the cameras clicking as many were in awe of the largest groups of pairs they had every seen.

Back at the farm, they had penned displays and Valley's End Charolais also displayed and had personalized gift bags for all guests. Deb had labeled each one with their flag and name and they included a pair of Valley's End leather gloves and numerous Canadian treats. It was a personalized touch that impressed all.

Pitchfork Fondue at CK Sparrow Farms

A roast beef and yorkshire pudding supper was followed by a large selection of prairie pies, including rhubarb and saskatoon. There were activity stations in the calving barn that included shooting a hockey puck at target net and a roping lesson by a competitive roper. These were both well utilized and allowed the guests to gain an appreciation for the skills involved in both sports. The riding arena had a dance band playing and a dance party in the dirt was enjoyed.

On our tenth day, the guests enjoyed a leisurely morning before we made our way to Vanscoy. We made jello shooters for our morning Canadian

Pasture tours at CK Sparrow Farms

snack and it was fun to watch them attempt to eat them.

CK Sparrow Farms toured the group through pastures in vehicles in two shifts. W2 Farms displayed cattle and many other breeders were on hand to visit with the guests. Grain equipment was also on display and was definitely inspected. Merv's Pitchfork Fondue catered ribeye steaks and fries, which attracted a lot of attention.

The internationals' appreciation of Canadian Charolais grew as the trip progressed. The uniformity of the cowherds and the udder quality was definitely noticed. The size of the

cowherds made a difference in their understanding of zero tolerance for calving issues.

Eatmore chocolate bars were the Canadian snack on the bus for the morning of day eleven. We did a drive through of the GrowSafe research happening at Highway 21 as Lyle Miller and Brady Scott each hopped on a bus to explain what we were seeing. We had a Game Changer presentation about the financial implications of feed efficiency at the Delia Hall before our beef on a bun lunch. There were many

questions and appreciative comments on the need to pay attention to anything that increases profit in the industry.

The afternoon at Stettler put together by the Alberta Charolais Association was exceptional. There was

a definite wow factor for the amount of breeders displaying cattle, the shopping displays and the superb music played by Ethan Hardy and sponsored by Rawes Ranches. The desire to own Canadian genetics was definitely alive and well, but the EU regulations have definitely hindered transactions. Many Alberta breeders came to be part of the excitement and many renewed acquaintances with international guests from past Congresses. It was a festive afternoon capped-off with a scrumptious beef supper.

We had an early stop at Jones Boys, in Red Deer, on day twelve to

Alberta Charolais Association breeder displays in Stettler

John Scott (right) visiting with World Charolais delegates

McLeod Livestock hosted the Genetics For The World Sale

do some fast, efficient shopping. The opportunity to buy things not available at home was taken advantage of by many, before going to the Innisfail Wilfe Life Park. The bear show was the highlight and the education offered was absorbd. Many took the opportunity to have their pictures taken with a bear.

We had a quick drive through the Highway 21 feedlot at Acme and enjoyed a pulled pork lunch with butter tarts (truly Canadian) for dessert.

The Charolais Charbray International Annual General Meeting was held upon our arrival in Calgary before supper was served. Details of the meeting are in a separate article. It was a welcomed treat to checkin to our last hotel where we would remain for the duration of the event.

John Scott Productions, Longview, started day thirteen with a tour of the movie sets on his land. The morning was full of clicking cameras and absorbing the stories John shared. Everyone found it interesting and many were determined to download some movies filmed at the sets to watch on their flights home. John is

the move humble, approachable man and his charisma captured everyone's attention.

Lunch in East Longview Hall gave everyone an opportunity to visit with John more and share a lunch made and served by his family that caters to the tv and movie industry.

McLeod Livestock spent days preparing to open their farm for our guests. The weather was not what we would have liked for the afternoon, but the wow factor here was definitely high. Everyone looked through the cattle on display by McLeod Livestock and Triple M Livestock. The specially canned Triple M margaritas were enjoyed and the sale was exceptional. There was much discussion about the sale in the last days as many countries do not have these open market and online events in their countries.

"Everyday I think, it can't get better than this, and then it does," shared Jen Wilson, Australia. "It has just been an exceptional trip."

Banff was the highlight of day fourteen and thankfully, we had a beautiful sunny day to enjoy the views.

Everyone was on their own and many took hikes while others shopped, but all enjoyed the scenic Canadian Rockies.

The day ended with the final gala dinner in Calgary with entertainment by the Robert Gosse band. There was a lot of dancing and mingling until the people started to disperse for the night. They knew day fifteen was going to be big.

The Canadian Charolais Association hosted a Stampede Breakfast at their building. As you can imagine, many had their picture taken with the sign and the fibreglass Charolais bull. Dustin Farr provided excellent music and Ken Stauffer, Neogen, made a presentation. Guests took the opportunity to tour the building and picture some of the history it holds.

The Calgary Stampede provided more than some could imagine. The rodeo was exceptional, our seats were perfect, the weather was great. There were over 100,000 people that day and our guests thought the crowd was large. Later in the week on family day, the attendance record was broken at

Innisfail Wildlife Park bear show

Michael Sturgess, Texas (right), presenting AICA hospitality gifts to the Canadian hosts at the World Charolais Gala Banquet

PLAN EARLY FOR EXPORTING OPPORTUNITIES

by Linda Eck

Marketing livestock genetics is a full-time job, and for breeders looking to push their program into other countries by exporting semen, embryos or oocytes, the task can seem daunting, as preparation starts long before the plane departs from the airport.

Planning ahead to ensure health requirements, quality control and management protocols are followed can alleviate problems when the need arises to meet demand for the export animal-origin products.

Bulls are required to meet a variety of health standards before semen can be collected and qualify for export status. And, in most instances bovine embryos and oocytes are required to have a U.S. Origin Health Certificate, most of which are specific to the country of export.

Minimum standards to help ensure bulls being collected are free of diseases that can be seminally transmitted through artificial

insemination have been established by Certified Semen Services (CSS), a subsidiary of the National Association of Animal Breeders (NAAAB). CSS also outlines sanitary procedures for collection centers and processing requirements to protect the health of donors and the herds in which semen is used.

It All Takes Time

“It is important for producers to remember that not all countries have the same requirements”, said Steven Rogers, who along with his wife, Jamie, owns ShowMe Genetic Services, LLC, in Strafford, Mo.

“Basically, a bull needs to be at stud for roughly 60 days of quarantine until cleared to export status,” added Rogers, whose facility is one of 45 NAAB members in North America.

“CSS Minimum Requirements are simply a baseline set of requirements. Each country has unique and different sets of guidelines regarding minimum

testing and testing throughout the CSS Residence period,” Rogers continued. “We work closely with clients to identify their potential markets, but we also bank blood/serum from strategic times to be able to go back and potentially qualify a bull’s semen for export.”

Semen for export must be collected in a CSS export-qualified facility under biosecurity guidelines. Bulls must be tested negative for Tuberculosis (TB) within 60 days prior to arrival and will later undergo a second test with a 60-day gap between tests. They must also be found negative within 30 days of arrival for Bovine Viral Diarrhea, five strains of Bovine Leptospirosis, Tritrichomonas and Bovine Genital Campylobacteriosis. It is highly recommended that bulls are not vaccinated immediately prior to testing, as the vaccine can cause positive test results. Rogers recommends that bulls be immunized for Lepto at least two months prior to collection.

Rogers also noted that negative *Trichostrongylus axei* tests are required for six weeks. At ShowMe Genetics, bulls are tested every Tuesday during quarantine to meet the requirement.

Depending on the country of export, additional testing may also be required. An official identification is almost always required on all test reports and tattoos are not regarded as official id.

Once a bull has passed through all the testing requirements, and attains CSS residence status for export, Rogers noted it is possible he may not produce export quality semen right away.

CSS standards require collection centers use systems and processes that reduce risk factors that otherwise may lead to disease transmission, identification, semen quality control and/or product safety errors. Purposeful communication and on-site audits, including an annual audit with a United States Department of Agriculture (USDA) representative, are maintained to ensure compliance.

Shipping Embryos and Oocytes

Similar to CSS requirements, the USDA Animal and Plant Health Inspection Service (APHIS), Veterinary Services (VS) has created the International Animal Product Export Regulations (IRegs) to provide producers who are exporting certain animal-origin products with a resource for understanding and meeting requirements of importing countries.

This is helpful to breeders in determining what requirements must be met. Embryos and oocytes are considered animal-origin products and requirements are also outlined for the donor cows and donor bulls involved

in creating them. A health certificate is required.

However, as noted on the USDA's IRegs website, countries may change their import requirements without notice, and in all cases, exporters are responsible for confirming, prior to shipment, that they have all certification required. APHIS also provides alerts, restrictions and guidelines that may need to be followed during the exporting process. Restrictions are typically based on disease status of participating countries.

Veterinary Health Certificates also vary in design and information required, depending on the destination country. Rogers said it's important to realize that shipments are being made to countries, not just continents. As an example, he reminds clients that South America is a continent and "the countries in South America each have their own guidelines."

For exporting guidelines, the following websites provide an abundant source of information:

NAAB-CSS <https://www.naab-css.org/minimum-requirements>
 USDA/APHIS <https://www.aphis.usda.gov/live-animal-export>

Importing Bovine Semen and Embryos

APHIS regulates the importation of all ruminants and their germplasm – embryos, oocytes, semen and cloning tissue – to help prevent the introduction of foreign animal diseases

into the United States.

With many countries around the world dealing with Foot and Mouth Disease (FMD) and Bovine Spongiform Encephalopathy (BSE), the importation of bovine semen and embryos into the United States is only allowed from a few countries. As of March 22, 2024, these included Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Estonia, Finland, France, Germany, Great Britain (England, Scotland and Wales), Hungary, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, New Zealand, Northern

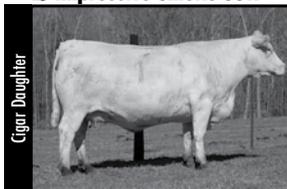

Ireland, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden and Switzerland. These countries represent approximately one-third of the countries listed on the APHIS website.

Country specific health certificates are required. Any animal-origin product traveling into the United States may not transit through countries with questionable disease statuses prior to reaching a U.S. Port of Entry. A contingency plan is also required and may be submitted to USDA APHIS along with an import permit application.

An only Veterinary Services Permit for importing animal-origin products can be found by visiting the website at <https://www.aphis.usda.gov/animal-product-import>. 📄

However, as noted on the USDA's IRegs website, countries may change their import requirements without notice, and in all cases, exporters are responsible for confirming, prior to shipment, that they have all certification required.

AICA MEMBERSHIP NEWS NOTES

LIVESTOCK PUBLICATIONS CELEBRATES 50 YEARS

Livestock Publications Council (LPC) celebrated 50 years during the recent Ag Media Summit (AMS) held in Kansas City, Missouri on August 5, 2024. July 13, 1974, was the inaugural LPC meeting, and the Charolais Journal was an LPC Charter member under the leadership of Forrest Bassford. LPC has become a vital driving force in the livestock publication industry, involving scholastic and governmental matters as well as maintaining a steady vigilance on its members to aid them in improving their publications esthetically, financially and in content. The mission was to promote understanding and cooperation among publications serving the livestock industry. That industry being the production and marketing of beef cattle, dairy cattle, horses, swine, sheep and goats.

At the 50th Anniversary celebration, August 5, 2024, eight past Presidents (year served) attended: L to R: Ben Richey (2022-2023-MO), Lisa Bryant (2006-07-OK), Scarlett Hagins Madinger (2016-17-KS), Angie Stump Denton (2015-16-KS), Lori Maude (2005-06-SD), the late Greg Henderson (2000-01-KS), Amber E. Spafford (1990-91-MO), and Cheryl Oxley (1995-96-MO).

over 200,000. They were surprised at the size of the event and the variety and magnitude of everything offered.

The rodeo, chuckwagon races and relay races were well documented with pictures and videos. They thoroughly enjoyed the day and the evening grandstand show was exceptional. It included dancers, acrobats, the Hunter Brothers, a drone show and fireworks. What a terrific way to end an epic trip! 🇺🇸

World Charolais Congress Delegations:
Australia, United Kingdom, United States, New Zealand, Czech Republic, Ireland, France, Hungary, Sweden, Estonia, Canada & Mexico.

Michael Sturgess and Antonio Delgado Gutierrez, Charolais Charbray Herd Book of Mexico President – Mexico will host the 2025 World Technical Conference

United States breeders attending the World Charolais Gala Banquet

“The World Charolais Congress in Canada was one of the more memorable experiences I have had. To have the opportunity to exchange and share ideas with breeders from different parts of the World is valuable, and you would be surprised that we share many of the industry concerns as our counterparts. Most importantly, I am confident that our collaboration with our Canadian and Mexico friends will be better than ever before. These breeders not only share a border with us, but a strong desire to increase the demand for Charolais genetics.” Michael Sturgess, AICA President

CHARFOCUS

YOUTH CONFERENCE

July 22–25, 2024 — Ames, Iowa

The AIJCA hosted 28 youth participants from 14 states for the third annual VitaFerm CharFocus Youth Conference, July 22-25, 2024, based in Ames, Iowa. Attendees ranging from 14-21 enhanced their leadership skills by growing their network and meeting new people, explored Iowa agricultural businesses and Iowa State University and visited Charolais herds.

The conference began with a networking opportunity with twelve Summit Agricultural Group interns. Interns and participants shared their backgrounds, summer experiences and goals for the future. Summit founder Bruce Rastetter and his team shared insights about their various business units and toured us through their Percheron horse stables, cattle pastures and gardens.

Will Taylor, Assistant Teaching Professor and Livestock Judging Team Coach at Iowa State University, led our tours Tuesday morning. Students explored the ISU campus and

Animal Science buildings, were empowered to be an innovator and viewed the beef nutrition research facilities. With offices not too far from campus, we stopped by the Iowa Cattlemen's Association and Iowa Beef Industry Council's building. Bryan Whaley, CEO of Iowa Cattlemen's, discussed the value of being an active member in your state's association and Casey Anderson, IBIC Director of Industry Relations, explained the Beef Check-off and their mission to expand consumer demand for beef.

Attendees expanded their knowledge of Iowa's row crop industry with a visit to Corteva Agrisciences. We viewed corn, soybean and other crops in the greenhouses, learned about seed treatments at the Center for Seed Applied Technologies (CSAT), and explored their state-of-the-art crop gentyotyping and engineering labs. The evening concluded with a herd tour of Cannon Charolais Ranch, Newton, Iowa. Tom and Jen Cannon opened their facilities to attendees and discussed their operation and breeding model.

Viewing the donor pasture at Cannon Charolais Ranch.

On Wednesday, we continued industry tours at Vermeer Corporation. The morning began with a guided tour through the Vermeer Museum learning about not only the history of business and its culture but also their philanthropic impact on their community. Mark Core, Executive Vice President, Forage & Lifecycle and Chief Marketing Officer, served as our keynote speaker sharing advice and insight for personal and professional growth. The morning concluded with a tour of Plant 2. We started at one side of the plant with raw metal and inputs and at the end of our tour saw finished yellow round balers of various models.

We were next off to Boyert-Core Show Cattle where Jared & Bailey Boyert shared their personal experiences of what they learned as young adults working for others, beginning their cattle operation and managing the family business. Then back to Iowa State University for a tour of the Veterinary School. Vet students spoke about their acceptance into vet school and the challenges they overcame on their path. We rounded out the conference with an evening of escape room competition, a BBQ dinner at the iconic Ames restaurant, Hickory Park and activities led by the Junior Board. Watch for the announcement for next year's event!

CHAROLAIS USA

Podcast

The Charolais USA Podcast is your go-to resource for all things related to the Charolais breed of cattle, in each episode we will focus on industry trends, news from the association, and provide valuable insights into the latest developments in breeding, genetics, marketing and the Charolais community. Whether you're a seasoned breeder or just starting in the Charolais world, this podcast offers a wealth of information to help you stay informed and engaged in the Charolais breed.

Available on *Apple Podcasts, Spotify, Google Podcasts, and Amazon Music.*

PLAY

How are Char-sired feeder cattle selling in today's market?

Dennis Metzger, Metzger Marketing, markets feeder cattle sourcing from 16 states while also serving on the AICA Commercial Committee. Tune in to hear his insights from a busy summer video sale season transitioning to fall, what bull buyers must know about marketing their calves, and how Charolais producers can build a market for their cattle.

PLAY

Do older genetics get discounted in their EPDs, why don't my EPDs match animal performance, how do I form contemporary groups, and are genomics more important than ultrasound?

Kelli Retallick-Riley, AICA Genetic Consultant, joins the podcast to discuss these breed improvement and EPD topics as submitted by the AICA membership. Listen in as Kelli describes the importance of data in our genetic evaluation, and how breeders can best set themselves up for success utilizing these tools in their own herds.

CARCASS & ULTRASOUND DATA

Maggie Smithee
Recording Secretary
msmithee@charolaisusa.com
or call 816-464-2474 x401.

CARCASS DATA-

The data collected and entered into our system on animals recorded with AICA, is critical to the monthly evaluation. We have a tremendous amount of birth and weaning data submitted each year. To help build an even stronger evaluation, we need further data from you, our breeders. We are looking for yearling weights, ultrasound, and carcass data. The carcass data is the most desirable, but we understand not all breeders have access to it, so ultrasound is a great piece to have if carcass data is not available. If submitting carcass data, we have an excel sheet that can be used:

CARCASS RECORDS														Total Calves: 1	
BREEDER #	HARVEST DATE	CALF ASSN NUM	DAM ASSN NUM	SIRE ASSN NUM*	CALF BIRTH DATE	MARB1	MARB2	QUALITY GRADE	HOT WT	BACKFAT	RIBEYE	KPH	HARVEST WT	YIELD GRADE	

ULTRASOUND DATA-

Ultrasound data should be collected on all calves in the yearling contemporary group and cattle should be between 320-430 days of age. All cattle must also have a weaning and yearling weight taken at appropriate times and reported to AICA. Furthermore, a weight should be taken at the time of ultrasound data collection. Along with the ultrasound information, the following information should also be reported to AICA: Ultrasound technician information, AICA Registration Number or assigned AICA performance number, permanent identification (tattoo) number, date of birth, sire and dam registration numbers, ultrasound date, and group and management codes. These files will be emailed to the AICA office. Once we receive and download the information, a report will be emailed to the breeder to be reviewed. This is the barn sheet to have filled out and submitted from your technician:

Sarah Almond
Assistant Recording
salmond@charolaisusa.com

8/2/2024

It has been a common practice to collect ultrasound measurements only on bulls as an aid to marketing. However, for the purpose of genetic evaluation, ultrasound data on yearling heifers may contribute as much or more to the evaluation as the data collected on yearling bulls.

Please reach out to the myself ext. 402 salmond@charolaisusa.com or Maggie ext. 401 msmithee@charolaisusa.com . We'll be happy to help or answer questions!

ADVERTISING RATES

EFFECTIVE WITH THE JAN. 2022 ISSUE

The following terms and conditions govern all advertising in the *Charolais Journal*, which is used without separate or additional contract terms.

BREEDER ADVERTISING SPACE

Black & White	1x	11x
1 page	\$750	\$650
2/3 page	550	485
1/2 page (h)	450	375
1/2 page (v)	500	400
1/3 page	300	250
1/4 page	250	200
1/6 page	200	150
1 inch	50	35
Position pgs (1-7)		1,150
Inside Covers		1,200
Back Cover		1,300

CLASSIFIEDS

Prepaid.

Rate: \$1 per word, \$30 min., paid in advance.

Deadline 25th of the 2nd month preceding publication

COLOR

1 standard additional color		\$175
- red or blue (availability basis)		
1 non-standard color		275
- (availability basis)		
4-color		475
Special color		475
Metallic color		600

ADDITIONAL CHARGES

B/W photo (each)		\$15
Color photo (each)		50
4-Color page correction after approval (per page)		150
B/W or 2-Color page corrections after approval (per page)		100
After deadline charge		100
Difficult ads requiring substantial extra production time will be charged a minimum \$50/hour rate. If you prefer no extra charges, request that the Journal staff simplify the ad if necessary at their discretion.		

CANCELLATION POLICY

Charges dependent upon stage of production will be invoiced to advertisers who cancel previously submitted advertising.

DISCOUNTS

A 5% discount for all advertising will be given if prepaid for one year. No agency commissions allowed on breeder rates.

CLOSING DATES

All advertising copy (including photos) must be in the Charolais Journal office by the 25th of the second month preceding publication, i.e. Jan. 25 for the March issue or the first working day thereafter. A \$100 late fee will be applied to all late advertisements. Proof deadline: 20th of the second month preceding publication, i.e. Jan. 20 for March issue.

ADVERTISING CONTENT

The Charolais Journal reserves the right to refuse any advertising or copy at its sole discretion. The Charolais Journal assumes no responsibility for the accuracy and truthfulness of submitted advertising containing pedigrees or statements regarding performance. The Charolais Journal accepts no responsibility for the accuracy of any photographs supplied by other than its own staff. Advertisers shall indemnify and hold harmless the Charolais Journal for any claims concerning advertising content as submitted.

Notice to advertisers: Advertising for sales scheduled prior to the 20th of the month of publication accepted at the advertiser's risk. The Charolais Journal assumes no responsibility for distribution.

REPRINTS, CATALOGS AND BROCHURES

Advertising and editorial reprints available. Sale catalogs and brochures are produced at special rates. Contact office for prices.

LT Governor has been a standout since the day he was born and is a performance game changer for any operation. The depth and consistency of his calves is incredible, they are stamped to perfection and definitely catch the eye! The future looks great for Governor with his performance, soundness, fertility and overall stamp of perfection he leaves on each and every one of his offspring!
